

About Us

Founded in Edinburgh in 2016, Quorum Cyber defends organisations around the world and in all sectors against the rising threat of cyber-attacks, enabling them to thrive in an unpredictable and hostile digital environment. We're a Microsoft Solutions Partner for Security and member of the Microsoft Intelligent Security Association (MISA). In 2022 we were the first cyber security company headquartered in the UK, and one of the first few worldwide, to be verified by Microsoft for our Managed Extended Detection and Response (XDR) service.

We believe in helping good people win. Our vision is to deliver the most forward-looking and innovative cyber security services in our industry. Our mission is to stay ahead of the threats of tomorrow and help defend our customers from known and emerging threats.

FEDERICO CHAROSKY
FOUNDER & CEO

At its heart, cyber security isn't a technology problem, it's a risk management problem. We design and deliver all our services to help you continually reduce your risk exposure over time. By partnering with you, we deliver a clear return on your investment, wherever you are on your cyber security journey.

With 1,000 years of combined Microsoft and cyber security experience, we offer end-to-end services for organisations of any size and complexity, anywhere in the world, all to ultimately reduce their risk:

-  Managed Extended Detection and Response (XDR)
-  Microsoft Sentinel Managed Detection and Response (MDR)
-  Incident Response (Incident Response Preparedness / Incident Response Retainer)
-  Emergency Incident Response
-  Tactical Security Operations Centre
-  Security Advisory (Security Strategy & Virtual CISO / Cloud Security)
-  Microsoft Security Workshops & Proof of Concept
-  Offensive Security
