

Azure Files Migration Assessment

A dedicated Quorum engineer will conduct an Azure Files workshop and migration assessment with your team to determine what legacy file shares and workloads can be moved to Azure Files.

As organisations embrace cloud technologies and hybrid working, they're also adopting a new approaches to accessing data and moving away from traditional on-premises or server based file shares. With Azure Files, you can adopt this approach to simplify management, improve security, provide a better user experience, and lower the TCO.

The Azure Files Workshop and Assessment Provides the following:

- An experienced Quorum consultant and Project Manager for 7 days to drive the engagement
- A high level design document that will contain a information on the current state, future state as well as migration approaches and strategies for adoption of Azure Files

By conducting our Assessment, which delivers a design blueprint for a new Azure Files platform. This assessment delivers the following outcomes:

- Customer stakeholder workshops to discuss current and future states
- Understanding of current file share usage
- High Level Solution Overview
- Best Practice and guidance to adopt Azure Files including:
 - Azure Landing Zone Requirements
 - SMB / NFS Shares
 - Identity & Access Management
 - Network Considerations
 - Discovery Recovery & Failover
 - Backup
 - Migration Approach
