

Azure Virtual Desktop Assessment

Quorum will conduct a Azure Virtual Desktop Workshop and Assessment with the customer to identify user persona's, remediation activities and migration options to move from legacy VDI platforms to Azure Virtual Desktop.

As organisations embrace cloud technologies a key area of modernisation is moving away from legacy VDI Platforms such as Citrix to Cloud Native Platforms like Azure Virtual Desktop.

By conducting the Azure Virtual Desktop Assessment the customer will capture the following key outcomes helping to migrate workloads to AVD:

- Customer stakeholder workshops to discuss current and future states.
- Understanding of current VDI landscape
- High Level Solution Overview
 - Azure Virtual Desktop Future State including
 - User Persona's
 - Host Pools
 - Application Deployment
 - Profile Container
 - Auto Scaling Approach
 - Security Controls
 - Azure Landing Zone Integration Requirements
 - High Level Migration Approach from legacy VDI to Azure Virtual Desktop
- Remediation Items
- Risk Matrix

The Azure Virtual Desktop Assessment Provides the following:

- An experience Quorum consultant to help drive the customer and engagement to move to Azure Virtual Desktop,
- A High-Level Design, Assessment and Recommendations document.

The Azure Virtual Desktop Journey

- 1** Assessment:
Understand your organisations readiness, focusing on analysing readiness to adopt, deploy and manage AVD ecosystem.
- 2** Design:
Design Simple, Secure and Scalable AVD Environment
- 3** Deploy:
Deploy Hostpools, FSLogix and MSIX App solution based on identified personas.
- 4** Rollout:
Phased user onboarding to the AVD environment
- 5** Manage:
Monitor and manage the health of the solution as well as continued optimisation

How Quorum drives your AVD Solution

Solution Focused

Understand your options per user or consumption and how it is implemented with other Microsoft Cloud Services.

Deployment

Set up for successful deployment through meaningful engagement in the assessment process.

Manage

Gain expert insights into best practice management of Azure Virtual Desktop.

Drive Adoption

Utilise assessment insights to understand how best to drive user adoption of Azure Virtual Desktop and troubleshoot any deployment issues.

Automation

Explore opportunities to drive efficiency and security through automated imaging, deployments, scheduling and monitoring.

Optimise

Deliver cost-saving opportunities by analysing AVD usage and automating outcomes.
