

# APRA CPS 234 Assessment

**APRA standard CPS 234 requires APRA regulated entities to take measures to be resilient against information security incidents (including cyberattacks) and maintain an information security capability commensurate with information security vulnerabilities and threats. If you are an APRA regulated entity you must comply with CPS 234. This offering enables your organisation to confidently understand your compliance status, identify potential gaps and provides recommendations to remediate them through the power of Microsoft 365.**

### **Why do you need the Microsoft CPS234 Assessment?**

If you are an APRA regulated entity you must comply with CPS 234. Our assessment enables your organisation to confidently understand your compliance status, identify potential gaps and provides recommendations to remediate them through the power of Microsoft 365.

### **What is the CPS 234 Assessment?**

The 'Microsoft CPS 234 Assessment' is a review performed in accordance with the APRA CPS 234 standard and industry best practices. It includes recommendations to improve your organisation's compliance status, security and privacy posture and to address security and privacy issues that are discovered as part of this review.

As part of the assessment, our consultant will consider:

- Do you have clearly defined information security-related roles and responsibilities, including Board, senior management, governing bodies and individuals?
- Do you maintain an information security capability commensurate with the extent of threats to your information assets?
- Have you implemented controls to protect information assets commensurate with the criticality and sensitivity of those information assets?
- Do you undertake systematic assurance regarding the effectiveness of those controls?
- Do you have the ability to respond to information security incidents?
