

# Secure Your Hybrid Workplace

Secure and simplify endpoint management to reduce costs, optimize your infrastructure and prepare your devices for the AI era.

Endpoints are physical devices that connect to a network, such as mobile devices, desktop computers, virtual machines, embedded devices and servers.

As the workforce becomes more distributed, protecting these endpoints from cyber threats has become increasingly challenging. Cybercriminals target endpoints because they are doorways to corporate data and vulnerable to attack. There's more at stake than your reputation — the financial impact is significant. According to the Ponemon Institute's "Cost of a Data Breach Report 2021," the average cost of a data breach is \$4.24 million globally, and \$9.05 million in the U.S.

## Experts Dedicated to Your Success

Since 1998, Rackspace has provided security services for Microsoft® technologies, winning accolades for intellectual leadership and growing into a leading cloud service provider known for Fanatical Experience® — an obsession with customer success that drives Rackspace to help each customer work faster, smarter and stay ahead of what's next.

With every engagement, Rackspace helps customers set a new standard for cloud hosting — introducing new products and services, intuitive features, tools and accelerators that dramatically improve the performance, usability and adoption of secure and scalable infrastructure.

## Key Features

**Fortify zero trust security:** Leverage Microsoft Defender XDR within a Zero Trust framework to enhance detection and response capabilities, giving you comprehensive visibility and control over threats. This system not only secures but also automates the analysis of signal, threat and alert data from your Microsoft 365® environment, potentially reducing breach-related costs by up to \$1 million.

**Efficient endpoint management:** Simplify your IT operations with Microsoft Intune®, reducing setup time for new endpoints by 75% and software deployment/management time by 25%. Save up to \$5.2 million by consolidating management tools, improving endpoint performance and cutting incident recovery costs by up to 96%.

**Lifecycle management made easy:** Utilize features like Intune Autopilot to streamline the management of your endpoint estate from provision to decommission, offering a unified interface for managing both physical devices and virtual desktops.

**Windows in the cloud solutions:** Deploy solutions that fit your needs — from Windows 365 Cloud PCs to Microsoft Azure Virtual Desktop. Cut IT deployment costs for desktops by up to 88% and improve end-user productivity by 15%, with added savings from faster employee onboarding and integration.

**Comprehensive protection against security risks:** Protect against phishing, ransomware, device loss, and outdated patches. Rackspace security solutions help strengthen your infrastructure for a more secure and resilient environment.

## About Rackspace Technology

Rackspace Technology® is your trusted partner across cloud, applications, security, data and infrastructure.

- 2,200+ certified technical experts
- Hosting provider for more than half of the Fortune 100
- 25+ years of hosting experience
- Customers in 120+ countries

## Fanatical Experience

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

## Key Deliverables

What you want to achieve	How Rackspace delivers
Accelerate Microsoft Azure® and Microsoft 365 endpoint adoption, landing, compliance, and protection.	Review your environment and identify gaps to develop a tailored, high-level plan for day-two operations.
Create a single end-to-end solution to support all your endpoint needs across Windows 11, Windows 365, Mac or Linux.	Build a best-in-class adoption plan using proven delivery principles, enabling rapid activation of endpoint management.
Shorten time to value, reduce costs, and prepare devices for secure, AI-ready operations.	Optimize your environment with modern reporting and analytics, and apply key principles to improve endpoint management for the AI era.

## Secure Your Endpoints Today

Join thousands of satisfied customers who trust Rackspace for their endpoint security needs. Take control of your digital security and ensure peace of mind with our advanced tools and expert support. Contact us today to learn more and get started.
