

# Threat Protection Envisioning Workshop

See what matters most, reduce risk and move forward with a clear Microsoft security plan.

Security teams contend with rising alert volumes, expanding cloud footprints and persistent exposure across identity, email, devices and data. What's often missing is not tooling, but clarity: which threats matter most, where to focus first and how to turn insight into action.

The Threat Protection Envisioning Workshop from Rackspace Technology® cuts through the noise. It surfaces the threats actively targeting your environment, highlights priority vulnerabilities and delivers a practical, Microsoft-aligned plan to strengthen your security posture with confidence.

## Experts Dedicated to Your Success

Rackspace partners with you to translate Microsoft security expertise into practical outcomes. Through guided analysis and collaborative planning, Rackspace helps uncover real threats targeting your environment and maps them to tailored solution recommendations. The workshop delivers actionable insights, immediate remediation guidance and a longer-term security strategy aligned to your business objectives.

### Key Benefits

The Threat Protection Envisioning Workshop at Rackspace Technology includes the following:

**Focused threat visibility:** Understand the threats actively targeting your organization across email, identity, data and devices.

**Prioritized remediation:** Receive clear, ranked actions to address the vulnerabilities that present the greatest risk.

**Security roadmap:** Establish a practical, longer-term security plan aligned to Microsoft best practices and your operating reality.

**Targeted engagement:** Choose three of six modules to concentrate effort on the areas that matter most to your organization.

**Hybrid visibility:** Improve insight across Microsoft 365, cloud and on-premises environments to better manage risk end to end.

## About Rackspace Technology

Rackspace Technology is your trusted partner across cloud, applications, security, data and infrastructure.

- 2,200+ certified technical experts
- Hosting provider for more than half of the Fortune 100
- 25+ years of hosting experience
- Customers in 120+ countries

## Fanatical Experience®

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

## Key Features

The engagement delivers structured analysis and planning through:

**Security assessment:** Analysis of cybersecurity threats currently targeting your organization.

**Joint planning:** Collaborative development of next steps and solution recommendations mapped to identified risks.

**Stakeholder-ready documentation:** A documented security strategy to support executive and business alignment.

**Microsoft Security acceleration:** Guidance on how to advance your security journey using the latest Microsoft Security tools.

## Workshop Overview

| → Selectable module     | → Selectable module | → Selectable module                | → Selectable module | → Selectable module                      | → Selectable module |
|-------------------------|---------------------|------------------------------------|---------------------|--|---------------------|
| Unified SecOps platform | Email protection    | Endpoint and cloud apps protection | Server protection   | Microsoft Security Copilot demonstration | Identity protection |

During this engagement, Rackspace will partner with you to strengthen your organization's approach to cybersecurity. We'll help you better understand how to prioritize and mitigate potential attacks, with:

- Analysis of cybersecurity threats that are found targeting your organization.
- Actionable recommendations to help immediately mitigate the identified threats and discovered vulnerabilities.
- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps.
- Modular approach, allowing you to select three out of six available modules aligned to your needs and requirements.
- Visibility into vulnerabilities to your Microsoft 365 cloud and on-premises environments to better understand, prioritize and address vulnerabilities and misconfigurations across your organization.

## Who Should Attend?

**The engagement is intended for security decision-makers such as:**

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- IT Security Architects
- IT Security Administrators
- IT Security Operations (Sec Ops)

## Take the Next Step

Let's talk about how Rackspace Technology security expertise helps you strengthen your Microsoft security posture and reduce risk.
