

Rackspace Managed XDR Powered by Microsoft Sentinel

Redefining cyber risk management for the enterprise.

As digital innovations evolve along with generative AI, remote work and other technology advances — the attack surface in today's enterprises is changing at a rapid pace. This requires new ways to protect your digital estate against new and sophisticated threats.

To meet organizations on their journey toward modernizing their cyber defenses, Rackspace Technology developed Rackspace Managed XDR. This is a cloud-native, DevOps-centric managed security service that combines cloud-native SIEM technology and security expertise to deliver integrated detection and response capabilities across multicloud environments 24x7x365.

Experts Dedicated To Your Success

Rackspace understands the security challenges you're facing. With a dedicated team of security experts and over 25 years of experience helping organizations like yours strengthen their security, Rackspace is ready to help you strengthen your cybersecurity with solutions built on industry-leading platforms.

Key Benefits

The security experts at Rackspace integrate seamlessly with your team to deliver around-the-clock security monitoring, incident response and incident management. With this solution, you can take advantage of these benefits:

- **Unified view across your entire digital estate:** Our experts help you establish a clearer and more unified view of your security posture across your entire digital landscape, by aggregating log and telemetry data from over 300+ security tools into the XDR platform.
- **AI-assisted security expertise:** Our advanced threat detection capabilities combine cloud-native SIEM, near-real time threat intelligence, and the Rackspace XDR Content Pack, with AI-assisted Rackspace security experts to detect and respond to cyberthreats.
- **Expert guided remediation:** Rely on our security experts to deliver fast, effective and intuitive guidance for mitigation and remediation when threats are detected on customer-managed assets.
- **Threat hunting:** Conducts proactive threat hunts by security experts who detect new and emerging threats in the wild.

About Rackspace Technology

Rackspace Technology® is your trusted partner across cloud, applications, security, data and infrastructure.

- 1,700+ certified technical experts
- Hosting provider for more than half of the Fortune 100
- 25+ years of hosting experience
- HITRUST CSF-certified dedicated hosting environment
- Customers in 120+ countries
- Leader in 2022 ISG Provider Lens - Cybersecurity Solutions and Services U.S. Quadrant
- IDC- and Forrester-recognized security practices
- Certified PCI Quality Security Assessor by the PCI Security Standards Council
- Market-leading global SOC: Rackspace Cybersecurity Defense Center
- Member of Microsoft Intelligent Security Association
- Microsoft Azure Security Solutions Partner
- Microsoft Azure Security Specializations: Cloud Security, Threat Protection

Member of

Security Association

Fanatical Experience®

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Key Features

Rackspace Managed XDR delivers a broad range of capabilities designed to help detect and respond to cyberthreats across on-premises, hybrid cloud, public cloud and multicloud environments.

- **Extensible integration:** Integrates with over 300 security technologies and log sources, with the ability to extend further.
- **Risk-based threat intelligence:** Supplies near-real time threat intelligence to detect threats that could impact your business. Contextualizes and prioritizes threats, risks and vulnerabilities based on what's important to your business.
- **XDR content:** Provides pre-built detections, mapped to the MITRE ATT&CK® framework, that continuously improve over time in response to the evolving threat landscape.
- **Automated response with guided remediation:** Accelerates containment and eradication of threats through cloud-native security orchestration and automated response (SOAR). Solves issues via expert advice and guidance.
- **Integrated response:** Delivers a coordinated, integrated response to cyberthreats on Rackspace-managed technologies.
- **Security reporting and analytics:** Contextualizes and visualizes your security posture and delivers insights and recommendations from our security experts.

Take the Next Step

Let's talk about how Rackspace Technology cybersecurity expertise helps you achieve your security goals
