

UNLOCK DATA TO OPTIMIZE PERFORMANCE

Achieve data intelligence at scale by unleashing siloed and on-prem data. Organizations are often burdened by buying expensive enterprise systems to move data off-prem leaving them with unnecessary features and operational complexity.

Stream Data, Drive Decisions, Lead the Future with Leafcutter

Securely unlock real-time data from siloed historians to deliver operational excellence, cost efficiencies, and scalability.

Leafcutter connects with on-prem historian databases and transmits your insights to the cloud – in real-time and at scale.

Simple, Powerful, Scalable, Affordable

Improve operations with retrieval of historical data to the cloud.

Simplify data retrieval and send process data to the cloud in under 2 seconds of latency.

Achieve unlimited output streams and stream millions of data points per day.

Boost user productivity without needing historian expertise.
