RAPID CIRCLE

M365 COPILOT KICKSTARTER

Empower your people to improve productivity and enhance creativity

Microsoft Copilot is an AI assistant created by Microsoft that provides real-time intelligent assistance to users, enabling them to enhance their creativity, productivity, and skills. Copilot combines the power of large language models (LLMs) with your organisation's data to turn your words into one of the most powerful productivity tools on the planet.

There are several variations of Copilot including integrations with Power Platform, Viva and Security. The focus of this engagement is to deploy and adopt 300 licenses for M365 Copilot which works alongside Microsoft 365 Apps such as Word, Excel, PowerPoint, Outlook, Teams, and more.

Wave 0: Readiness

- Project kick off
- AI strategy & governance workshop
- Information management workshop
- Technical set up of Copilot
- Stakeholder mapping and change activity planning

Wave 1: Early Adopters

- Up to 50 Champions from across the organisation
- Change & Adoption activities
- Identify organisation specific use cases

Wave 2: Kickstarters

- Remaining 250 seats
- Change approach updated based on learning and use cases from Wave 1

Out of scope: deployment and adoption for more than 300 seats, information management project, M365 Copilot extensibility, other Microsoft AI deployments

Investment: $85,500 AUD ext. GST. The project will be delivered over a 12-week period.
