

MICROSOFT AI ACCELERATOR

Get ready for take-off with Microsoft AI for the modern workplace

Microsoft AI encompasses a suite of powerful technologies and tools that enable machines to learn, reason, and interact with humans, revolutionising industries and solving complex problems. To prepare organisations for the change AI will bring to the way we work, Rapid Circle offers the AI Accelerator.

The purpose of the Microsoft AI Accelerator is to create a strategy for the responsible and secure use of AI. Identify organisation specific use cases for the different technologies available, ensure your data is secure, prepare your technical specialists and design the tailored adoption approach that will best support your people. The final deliverable includes key recommendations for how your organisation should approach the Microsoft AI suite as well as a proposed implementation roadmap.

Strategy

Discovery

Next Steps

Microsoft AI Strategy & Art of the Possible to determine how AI can be used to improve your productivity and creativity in your organisation

Information Security assessment and discussion to ensure your data is secure
