SERVICES

RARECREW

Custom Development

Evolve your business by building a system that fits your needs. Our solutions are custom developed with an emphasis on quality, scalability and security utilizing the latest Microsoft stack. The implementation of tailor-made enterprise systems has been our core skill for over a decade.

Mobile Applications

When delivering applications to your business you might reach a point when a mobile friendly design simply does not cut it and your users demand more. Don't be constrained by frameworks and go for a custom iOS or Android system.

Business Intelligence & Analytics

Deploy advanced business intelligence and analytics to get ahead of your competition. We can show you how. From homogenous sources to complex APIs, our experienced team will prepare an insightful analysis of your business data.

Consulting

Keep up with the fast-changing technological segment thanks to our experience and deep know-how in the field. No matter if you need new software architecture, are looking to improve your infrastructure or migrate to the cloud, we have experts to help you.

UI/UX/Analysis

One tiny graphic element can decide whether the user will enter or leave. Rare Crew's UI/UX design teams use data to create designs that achieve your goals. Are you thinking of modernizing your applications? Speak to us as a partner to analyze and mock-up your new system.

Software Testing (TaaS)

Do you have a software project under construction? Talk to us if you want to work with our testing team to analyze your software. Our experienced testers will execute various testing strategies to discover potential threats or setbacks. An independent testing team is a good mitigation strategy to get your project delivered on time with minimal errors.
