# Cloud Endpoint Management with Security Briefing

**Ravanty**

## Workshop highlights

Improve your endpoint management and security posture with Microsoft Intune

Learn how to build management policies that protect your users, company data, and devices

Determine the best way to give your users access to the apps they need on the devices of their choosing

Build a roadmap for your organization how to best embark on Microsoft Intune journey, including Identity, Mobile Device Management, Mobile Application Management, Windows 11, Endpoint Protection, Provisioning Mechanisms and more.

## Explore the power of Microsoft's modern device management and security with Cloud Endpoint Management and Security briefing.

How are you managing your mobile devices, laptops, and other user endpoints? Do you know if your user's devices are compliant with your IT policies? Do you know if your user's identity is protected?

### Enable users to be productive and secure, on any device, without compromising IT security

**We'll work with you to:**

- Explore how to improve your management capabilities with Microsoft Intune
- Envision better protection for your endpoints by enforcing policies and deploying security tools
- Learn how to secure your identities with multi-factor authentication and conditional access from devices
- Enable your users to be productive with the applications they need, on the devices they want

## Who should attend

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Endpoint & Device Management owners/decision makers
- Application business owners
- IT Security
- IT Operations
