The CloudPak365 Pilot is designed to help clients establish all required and pertinent technology environment and business-centric components to transition to Microsoft 365 and conduct production pilot migration of group of users.

Rapidly implement your technological dependencies to migrate to Microsoft 365, leading you to consensus and a cohesive strategy for Microsoft 365 transition readiness, with the goal to apply processes and training to the entire organization. Our Subject Matter Experts will envision and implement top-of-mind dependencies and provide relevant documentation for successful transition to Microsoft 365 within your environment.

We'll work with you to:

Discover, design, and implement general dependencies, your Identity and Access Management, your messaging and message hygiene environment, your collaboration needs, Security and Governance, Guide on Endpoint and Device management, Design Communication and Training Plan, provide Quick Start Guides, Learning Center Intranet Site, and more.

Value proposition

The CloudPak365 Pilot package is designed for clients who wish to transition to Microsoft 365 – regardless of the source platform they are transitioning from. This package will help conduct a thorough discovery, design, and implement required infrastructure with an actual pilot migration to Microsoft 365. This service helps clients understand dependencies, envision the requirements for a Microsoft 365 transition, and address key migration considerations and success criteria as part of production pilot phase. This package will help enable and empower your IT team with required technical and knowledge dependencies to address short- and long-term goals migrating to Microsoft 365.

Why Ravanty?

At Ravanty, we excel in transforming businesses through Microsoft Cloud Services, leveraging our deep expertise and robust implementation frameworks. Our commitment to client success drives us to deliver tailored solutions that enhance productivity, security, and efficiency. Over a decade of experience in guiding clients through their cloud journey. From consulting and deployment to adoption and change management, we cover all aspects. We integrate advanced security measures to protect your digital workspace. Our solutions are designed to meet your unique business needs and objectives.
