

Microsoft Defender Production Pilot Implementation

Holistic Approach.
Business Efficiency.
Modern Security.

Pilot highlights

Improve your endpoint management and security posture with Microsoft Intune and Defender for Endpoint.

Implement Defender for Endpoint with or without full adoption of Microsoft Intune.

Leverage integrated Defender capabilities to automatically disrupt ransomware cyberattacks.

Maximize your ROI from existing investments with Microsoft by implementing features and capabilities you already own.

Leverage Artificial Intelligence (AI) driven security across devices, applications, and collaboration tools with the power of Microsoft Defender suite.

- How do you ensure your endpoints are protected from zero-day attacks and ransomware without additional complexity in your security operations?
- How do you safeguard your critical applications from unauthorized access and data breaches?
- How do you prevent highly targeted phishing attacks from exploiting your email system to infiltrate the organization and steal sensitive data?

We'll work with you to:

- Help you leverage the capabilities of Microsoft Defender within your organization.
- Implement stronger security for your devices, applications, and collaboration tools by enforcing policies and deploying protection measures.
- Leverage the power of Entra ID to secure your identities.
- Onboard Windows and macOS devices via Microsoft Intune or Endpoint Security Settings Management.
- Configure Automatic Attack Disruption within your environment to protect and contain attacks in progress.

Value proposition

By integrating Microsoft Defender for Endpoints, Cloud Apps, and Office, your organization can benefit from comprehensive, AI-driven protection that adapts to your needs, ensuring a secure, compliant, and efficient IT environment. This powerful security suite allows you to focus on innovation and growth, knowing that your data and assets are fully protected from today's most advanced threats. With Defender's unified security management and real-time visibility, your team can quickly detect, prevent, and respond to threats across all layers of your digital ecosystem, reducing risks and minimizing operational disruption.

Why Ravanty?

When it comes to protecting your environment, you need an experienced partner. We are a trusted Microsoft Modern Work Solution Partner and consulting firm, deeply rooted in the Microsoft ecosystem since 2008. With our expertise, flexibility, and commitment to excellence, we effectively meet our clients' needs. We help transform your objectives to actionable results, customized to align with your specific business requirements. Our unwavering commitment ensures successful outcome for your business and technology objectives.
