

[ACTIVE DIRECTORY HEALTH CHECK]

We enhance the security of your Active Directory by providing a holistic health assessment

It is essential to keep your Active Directory (AD) configuration up-to-date and secure. The Ravenswood AD Health Check (ADHC) is a comprehensive solution, rooted in decades of practice, that assesses risk in three key areas of your AD – configuration, security, and operational procedures – and creates a snapshot of your overall health and security posture.

[CHALLENGES WE RESOLVE]

Our team's expertise, combined with a comprehensive report, will enable you to optimize your AD's health, enhance its security, and prioritize necessary actions. We ensure you:

Gain a comprehensive view of your AD infrastructure

Your personalized AD health check report, along with our expert analysis, will help you identify vulnerabilities and highlight opportunities for improvement.

Strengthen your AD security configuration

The report includes a prioritized list of action items and remediation recommendations to mitigate the risks identified in the assessment.

Modernize your AD and improve efficiency

We guide you through the process of removing outdated, default configuration settings, based on legacy operating systems, helping you modernize and simplify your AD.

[OUR APPROACH]

Through a direct consultation and a comprehensive audit of your AD, we help you:

Understand your environment

We consult with you 1:1 to understand your organization's AD, specific needs and concerns, and answer your questions.

Gather data about your AD

We scan your AD for security, configuration, and operational risks, including administrative roles and security, backup and restore, domain controller configuration, domain and forest configuration, DNS configuration, FSMO roles, Group Policy, High Availability, Logging, and more.

Generate your personalized report

We present a detailed report that includes descriptions of all findings and actionable recommendations to improve your AD health.

Provide guidance on next steps

We review the report with you, answering any outstanding questions, and providing customized, actionable guidance on the next steps for optimizing your AD health.

Implement Recommendations (if desired)

If desired, we can implement our actionable guidance to optimize your AD environment.

"Ravenswood took the time to understand our business and advised us on solutions that made the most sense for our unique organization and risk tolerance."
