Step 1: Install and activate the Excel to VCF converter.

The screenshot shows the 'Excel to vCard Wizard v4.1 (Trial)' window. The title bar includes the application name and standard window controls. The main window has a blue header with the title 'Excel to vCard Wizard' and the copyright notice '© Copyright RecoveryTools Inc. www.recoverytools.com'. The interface is divided into several sections: 1. 'Select your Excel file, you want to convert' with a text input field and a 'Select...' button. 2. 'Select Destination folder to save your Excel Contacts as vCards' with a text input field and a 'Save As...' button. 3. A checkbox labeled 'Save all contacts in one VCF file' which is currently checked. 4. 'Contact Fields Mapping' section with a table-like structure: a 'CSV Field' column, a 'vCard Field' column, and a 'Select' column. 5. A checkbox labeled 'Set vCard Encoding' next to a dropdown menu currently set to 'Default'. The bottom of the window features a yellow bar with four buttons: a help button '?', 'Buy Now', 'Activate License' (with a key icon), and a large 'Convert' button.

Step 2: Click on **Select** to choose the Excel files.
