### **RecoveryTools MDaemon Migrator**

Expert Tried and Tested MDaemon Converter to Migrate MDaemon into 25+ File Formats

The RecoveryTools MDaemon Migrator is a robust solution for all those individuals who want to move MDaemon data or convert its data into another standard extension. Thus, by using this tool one can seamlessly convert MDaemon emails, tasks, journals, calendars, notes, and other items into PDF, vCard, MSG, DOC, HTML, MHT, PDF, and more. The best thing about this MDaemon migration tool is that it also converts the attachments and all the attributes of the selected MDaemon files or folders. In addition to this, to boost the efficiency of the user, the tool offers some high-tech features such as a file-naming option, advanced filters, a preview mailbox before migration, and a file-saving destination option. These features help in productive MDaemon migration and management of files in proper hierarchy.

The moment MDaemon email migration completes, the tool pops up a confirmation message with migration status and output saving location. Thus, the user simply needs to click on the OK button to close the notification.

# Conclusion

This MDaemon migrator software is a standalone software that does not require the installation of any email server or plugin. Furthermore, this utility comes with a trial version that allows the user to seamlessly migrate the first 25 MDaemon emails of each folder for free. Therefore, once the user positively explores the interface and features of this advanced utility, they can buy the pro license and activate it using the activation key shared on the registered email address.
