

Who needs it

- E-commerce
- Retail
- Call centers
- Remote pin pad for card present
- Business to customer

Reduce fraud and get some peace of mind when you handle multiple credit card transactions.

Why you need it

Credit card theft and fraud are at record levels. Advanced Credit Cards from Red Maple gives you peace of mind.

This Microsoft Dynamics 365 for Finance and Operations, AX2012 and AX2009 extension securely accepts and processes credit card payments and practically eliminates fraud.

Its easy-to-use interface makes it simpler and safer for your business to make money without sacrificing customer service.

This is fully integrated credit card processing where you get to choose your processor.

Advanced Credit Cards ultimately lets you do more with less red tape. Our special features let you fulfill orders and pay invoices easier.

About Advanced Credit Cards

SECURELY HANDLE MULTIPLE CREDIT CARD TRANSACTIONS

Advanced Credit Cards from Red Maple™ enables businesses to securely accept and process credit card payments while reducing the risk of fraud and theft. All without sacrificing customer service.

Businesses can securely handle multiple credit card transactions in retail, e-commerce and call center. It's fully integrated credit card processing that allows you to choose your processor and no transaction fees.

Results

- *Accept credit cards on all platforms from e-commerce to projects to sales orders.*
- *Easy-to-use interface makes it simple to organize and grow your business.*
- *Software seamlessly integrates with Microsoft Dynamics 365 for Finance and Operations, AX 2009 and AX 2012.*
- *No hidden costs.*

REDUCE RISK OF FRAUD AND THEFT

This application is encrypted right out of the box to practically eliminate fraud and ensure credit card data is secure.

Instead of storing sensitive information locally, securely process transactions with profiles and tokens that allow you to safeguard your customer and business data and easily meet PCI requirements.

- *Advanced Credit Cards comes encrypted right out of the box.*
- *Instead of storing personal information that hackers want, securely process transactions with profiles and tokens.*
- *Easily meet PCI requirements.*

EASY TO INTEGRATE

We know you want to get more and do more with your software, but you might be worried about changing credit card processors. That's why we focus on integration and the power of choice. Advanced Credit Cards fully integrates with more than 15+ of the leading credit card processing companies for a true end-to-end solution with no transaction fees.

- *No need to start over with a new credit card processor.*
- *Advanced Credit Cards can be used with your processor and more than 15 others worldwide.*

GO WITH THE FLOW

Allow customers to buy products from one store and return them to another with the original transaction information.

It's true omnichannel between card not present, e-commerce and retail.

- *EMV and pin pad support.*
- *Works with ePOS, mPOS and cPOS.*
- *Gift Card processing.*

HOW ADVANCED CREDIT CARDS WORKS

This solution integrates with any e-commerce platform and D365 retail and call center. It also offers the capability to accept credit cards in person directly to sales orders without having to implement Microsoft Retail.

MULTIPLE PROCESSORS & GATEWAYS

Use the processor of your choice. Red Maple's Advanced Credit Cards is designed with the idea that software should optimize your relationship with your chosen processor. The software provides an integration that goes beyond simply sending transactions, where processors provide additional services, Red Maple does too.

NATIVE INTEGRATION WITH NO HIDDEN COSTS

Native extensions of Microsoft AX2009, AX2012, or Dynamics 365 for Finance & Operations (F&O) with no transaction fees.

POWERFUL OMNI-CHANNEL EXPERIENCE

Allows customers to buy products from one store and return them to another using original transaction information. True omnichannel between card not present, e-commerce and retail.

How Advanced Credit Cards helped a major distributor

Based in Cincinnati, Ohio, Rodem distributes and installs processing machinery for a wide variety of industries. Red Maple solved several issues for Rodem:

- Provided them with flexible commission payments on a tiered system, at time of invoice and at time of shipping.
- Customized their commissions to split commissions on the back end.
- Reduced the time they spent processing credit cards and managing commissions.
- Created fast, automatic credit card processing, error-free.

DIFFERENTIATORS

SECURE PAYMENT TRANSACTIONS

Stores sensitive cardholder information with card processors that support tokenization or profiles, eliminating the risk and liability of local storage.

HANDLE COMPLEX TRANSACTIONS

- Accept multiple cards and transactions per sales order
- Integrate with advanced warehousing
- Accept gift cards with Red Maple's Advanced Gift Cards

STREAMLINE YOUR ACCOUNTING PROCESS

- Allow customers to make payments on their accounts with credit cards
- Choose to process payments at picking list, packing slip, ship or invoice
- Automatic re-authorizations for exact amount owed or Auth Delta
- Flexibility to assign users or bank accounts by MID or card type for easy account reconciliation

What our customers say about it

"The Advanced Credit Card solution meets all of our needs for invoicing credit cards on sales orders and through the AR Payment journal. The software's design keeps us PCI compliant and is remarkably simple to use."

Once integrated, we never have to touch it. It just works."

— Candida Truitt, IT Business and Project Manager for Rodem

FREQUENTLY ASKED QUESTIONS

Q. Can we use our own credit card processor?

A. Yes. Red Maple supports several processors and gateways so that you can select the processor or gateway that works best for your needs.

Q. Can you support credit card terminals with your software?

A. Yes! We can support terminals using Microsoft Retail. We also support terminals that integrate directly to sales orders.

Q. Do you support gift cards?

A. Yes, we have two different services that we integrate with to support gift card functionality. If you use a different service, reach out to Red Maple to see about adding it.

Q. Can you support wallet pays or buy now pay later options?

A. Yes, we support multiple wallet pays and BNPL options including:

- Apple Pay
- PayPal
- Afterpay (BNPL)
- Klarna (BNPL)

Solutions

Red Maple has been in business since 1997. Since 2003, we have developed and provided Microsoft Dynamics solutions to customers worldwide.

PCI COMPLIANCE

Red Maple has provided solutions that are PCI Validated since 2008. Customers and merchants want to balance ease of use and security. With Red Maple's software and extensions, your company can select where you want to belong on the spectrum.

About Red Maple

Red Maple™ specializes in developing turnkey solutions that natively expand the capabilities of Microsoft Dynamics™ AX and Dynamics 365 for Operations. Globally deployed by 500+ companies, Red Maple's solutions offer extensions and additions to AX. Advanced extensions support complex business processes for credit cards, commissions, workflow, and recurring billing (including maintenance, usage, and royalties).

Their horizontal additions add new capabilities for revenue recognition, warranty management, chargeback claims management and mobile workflow. Red Maple also provides industry specific solutions for both retail and software distribution. **Advanced Credit Cards** enables businesses to securely accept and process credit card payments using native integration without hidden costs.
