Co-managed Microsoft Sentinel Subscription

Once you've deployed Sentinel, whether independently or through our Security Jumpstart engagement, our Co-managed Microsoft Sentinel Subscription provides the ongoing support you need to ensure optimal performance and security. This annual subscription ensures the health, performance, and efficiency of your Sentinel environment through proactive health checks, analytics, and administrative management support.

ONGOING HEALTH CHECKS

We deploy and maintain rules and workbooks to assess operational status, conduct routine reviews to identify potential issues, and schedule monthly syncs to discuss findings and recommendations, ensuring optimal performance of your Sentinel environment.

+

ANALYTICS SUBSCRIPTION

We continuously develop and refine our analytics to stay ahead of emerging threats. You'll receive quarterly analytic updates tailored to your specific environment, helping ensure you're equipped to detect and respond to the threats that matter most to your business.

+

ADMIN MANAGEMENT SUPPORT

We provide a package of support hours quarterly to assist with:

- Configuring data connectors and parsers
- Building and refreshing workbooks, dashboards, playbooks, and automations
- Creating custom analytics
- Troubleshooting Health Checks

Benefits

Optimize Sentinel performance

Proactively monitor your Sentinel environment's health, identify potential issues, and receive expert recommendations to optimize its performance.

Stay ahead of emerging threats

Enhance your security posture with our continuously updated analytics, powered by the latest threat intelligence.

Maximize your Sentinel investment

Focus on strategic initiatives—not admin ops. Expert guidance and support are available to help you get the most out of your Sentinel instance.
