

The main principle – We detect and correct problems before you even notice them

ABOUT Redeploy:

Take your environment to Azure with our Migration Services, an efficient and secure path to the cloud. Get all the benefits of Azure and make the most of your cloud investment - Our consultants help you with all aspects of Azure. When in Cloud, stay in control of your Azure resources with our CloudOps services, tailored for how things are built and should be run in the cloud.

See what customers are saying:

Redeploy are the best when it comes to Azure, hands down. They aren't afraid to challenge status quo and has revamped and modernized our e-commerce solution to be 100% up in the cloud.

– Pontus Ericsson, Vice President @ Cykloteket

WHAT WE OFFER

We are Azure and CloudOps experts defining new standards for how things should be built and run in the cloud. We believe that anything can be run in Azure. Our mission is to help you with your cloud-journey from start to production.

We have hands-on experience with designing, implementing, and monitoring state-of-the-art solutions for our customers. And being the only Swedish company that is both a gold certified and Advanced specialized partner with Microsoft shows we're pretty good at it.

Redeploy helps identify and discover your as-is state, develop your business cases and strategies for adopting and moving to Azure. How? Why? When? Who? What are the benefits, the cost drivers / savings?

Producing a Cloud Adoption business case / strategy ready to be implemented and executed on. We do this all the time for big enterprises, and we know what and how things should be done.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
