

Microsoft Fabric with Power BI Premium MVP

Redkite partners with high-potential, customer-led organisations to help them to achieve their strategic business objectives with data.

We believe that data intelligence has the power to accelerate your performance. The prize is better, faster and simpler decision-making across your organisation. Individually personalised experiences for your prospects and customers. More efficient, more effective operations through your supply chain. Redkite helps companies to set up their data for effective use, to unearth hidden information, and to embed insight into better, faster, simpler decision workflows. Success demands a multi-disciplinary approach, and Redkite brings a breadth of expertise, from business and data strategy to data products, visualisation, data science, data architecture, data engineering, data governance and change.

Our 350 staff members serve global clients headquartered in the UK&I, USA and Europe, principally in the consumer goods, retail and media sectors, including Diageo, Starbucks, Mondelez, Burberry, ITV, The Economist, The Guardian, Flutter, and many others.

Who is this for?

- Businesses with an **existing Azure Modern Data Platform** who want to utilise their existing tech with the benefits of Microsoft Fabric
- This Minimum Viable Product execution offers insights into Microsoft Fabric, its integration within your enterprise, and aids in the development of optimal methods for constructing a data platform.

What is Fabric?

- A Software as a Service (SaaS) experience for enterprises, covering everything from data movement to data science, Real-Time Analytics, and business intelligence
- It offers a comprehensive suite of services, including data lake, data engineering, and data integration, all in one place
- Enjoy a highly integrated, end-to-end, and easy-to-use product that is designed to simplify your analytics needs

What is the Value?

- **Reduce time to value** by unifying data management, analytics and AI
- **Easy-to-manage** modern analytics solution
- **Faster Visuals** as queries run directly on Parquet Delta files stored in OneLake.
- **Fast-path to load the data** via DirectLake straight into the Power BI engine
- **Futureproof solution** as the SaaS foundation used has supported Power BI for years, each workload will benefit as the foundation grows and improves

Journey in Practice

Our Approach: In **3 weeks**, our Solution Architects will enable you to quickly understand the features and capabilities of Microsoft Fabric, as well as relevant use-cases that can be delivered by the new solution.

Week 1

- Defining and aligning use case to your core business value and key KPI's
- Requirements gathering
- Infrastructure analysis and wireframing

Week 2

- Building out the Lakehouse and Power BI premium data model
- Visualising data aligning to your branding
- Producing a deployment plan

Week 3

- Deploy and socialise end output to users
- Capture and incorporate all relevant feedback
- Provide roadmap for future iterations

Benefits of Using Microsoft Fabric

<p>Scalability Designed to be scalable, easily adapting to meet the changing needs of businesses, helping to save costs and improve efficiency.</p>	<p>Simplified Data Management A unified platform for data management can simplify data storage, organisation, and access, improving data quality and reducing time to find and use data.</p>	<p>Enhanced Collaboration Users can share data and insights, and work together to build and deploy data-driven solutions, making it easy for teams to collaborate on data projects.</p>	<p>Improved Security Secure environment for data storage and processing, including features such as data encryption, access control, and auditing, helping to protect data from unauthorised access.</p>	<p>Reduced Complexity Provides a single pane of glass for managing data, including pre-built tools and templates to help automate tasks, reducing the complexity of data management.</p>	<p>Cost Efficiency A cost-effective solution for data management, helping to save costs by reducing the need for third-party tools and services.</p>
