

## Briefing

# A Single Source of Truth with Azure

Discover how your business can achieve a **single-source-of-truth with Azure** by consolidating, harmonising, and quality-assuring data from across the organisation via modern, metadata-driven, and controlled data engineering and data operations practices.

Better, faster, simpler decision-making across your organisation

Individually personalised experiences for your prospects and customers

More efficient, more effective operations

## What to expect

A one-hour discussion focusing on the opportunity for a Modern Data Platform within your organisation and the next steps to enabling **better, faster, simpler decision-making** by unlocking the true value of your data.

**Jon Tippell**  
Director, Redkite
