

Meaningful problems.

Solved.

# RedMane creates high-quality, innovative, industrial-strength software that improves businesses and lives.

RedMane is a software development company that puts people first—our clients, partners, end-users and our company. We work with purpose, passion and integrity to simplify and streamline technology systems. And we gain personal satisfaction from solving complex, meaningful business problems.

Working as your collaborative partner, we deliver the best possible solution, at the right investment, on the right schedule, with the right requirements for your organization.

## We start by listening

Our expertly designed systems and applications begin with a thorough, strategic understanding of your unique business requirements. Above all, we're a problem-solving company. We uphold excellence, expect our people to take initiative and believe in continuous learning and improvement. We resist the status quo, find better solutions that may not yet exist, and "get it right" the first time.

Many of the innovations and improvements in processes we are credited with were only possible because of the contributions and support from RedMane.”

**Ruth Kennedy**, State of Louisiana

## Comprehensive business and technology services

We will work with you—closer and more collaboratively than you may have ever experienced before—to understand the full picture of your business to create practical, actionable software. Our services often interconnect to build the right system and include:

- Strategic Analysis and Technology Planning
- Custom Application Development
- Technology Modernization
- Systems Integration
- COTS Software Implementation
- Maintenance and Enhancement

## Expertise that improves diverse organizations

Our four key areas include, but are not limited to, the public, commercial, human services and healthcare sectors.

We are especially proud of our success in the human services area. We've built our reputation on delivering human services technology solutions that simplify and streamline Medicaid eligibility and enrollment, Child Support Enforcement (CSE), child welfare, disaster assistance and other programs that millions of people rely on every day.

## Helping caseworkers make a greater impact

Propelled by our deep human services and COTS implementation expertise, we created mCase, a unique, completely configurable cloud-based solution that makes case management tasks faster and more efficient.

With mCase, staff can support their clients both in the office and in the field using mobile devices and the web, while providing an easy-to-use, powerful case management solution. mCase supports all aspects of the case management lifecycle, including intakes, assessments, service planning, outcomes measurement and eventually, closure.

## A unique company, driven by a singular culture

At RedMane, our transparent, vibrant, non-corporate culture creates an atmosphere of freedom, where we're excited to come to work. This environment attracts passionate software development and implementation experts who gain personal satisfaction from creating innovative software solutions, and solving your complex, meaningful business problems.

Our values are evident in everything we do. We strive to be honest, respect everyone, deliver exceptional quality and work with integrity. We personally care about the projects we work on, understand their importance and share a genuine concern for the people we serve.

HONESTY

INTEGRITY

RESPECT

QUALITY
