

Customer Success Story

Argonaut track and traceability application platform enabled a Global tier 1 supplier to achieve product process data genealogy and birth certificate records. The application is networked and linked across their global enterprise and enables real-time access to performance and production management dashboards.

Winning Results

14.0 Technology

- Enterprise approach: 28 facilities in 2 years
- Data at your fingertips 24/7
- Stand alone system or tied into existing MES systems

Data Dashboards

- Quick access to production data from any facility
- Trace a parts process steps
- Assembly performance attribute data

Throughput Increase

- Machine uptime increases by double digit percentage
- Tolerance stack Optimization
- End of line performance upstream feedback

Digital Acceleration

- AI Enablement
- Machine learning
- Diagnostic tools
- Data analytics

Reduced Costs

- Reduced Scrap/ rework
- Increased through put
- Increased FOT
- Warranty containment
