ARGONAUT®
MANUFACTURING PERFORMANCE PLATFORM

Argonaut® by RedViking is a modern Software Platform which enables our manufacturing customers to quickly deploy & scale best-in-class applications in the manufacturing sector.

Argonaut's core frame work provides standardized methods to quickly connect and integrate with existing systems such as ERP & PLM solutions, plant floor and edge-of-network devices and operator stations. These connections are leveraged to rapidly deploy and scale applications aimed to improve operational capabilities and minimize risk.

- ⚠ Web based access to configuration, reporting and real-time KPIs provide a modern user experience
- ⚠ Central management and monitoring of connected devices allows control and standardization of application deployment
- ⚠ Standard Argonaut or 3rd party applications offer quick deployment of customer specific solutions
- ⚠ Argonaut supports external Single Sign On (SSO) authentication for seamless navigation
- ⚠ API based access allows for easy integration and expansion of functionality

Argonaut® Applications: End-to-End Solutions to Real World Problems

⚠ OEE / Factory Information	⚠ Operator Error Proofing	⚠ Real-time Location Tracking
⚠ Dynamic Work Instructions	⚠ Automated Track & Track	⚠ Teardown and Repair Solutions

*"Realize **double-digit percentage throughput** improvement, reduced quality fallout & **improved uptime"***

- Remus Pop, Dana Light Vehicle Manufacturing

*"We wanted to do things like **remote diagnostics** and configuration and provide easy **remote access** to the data. In the end, we selected **Argonaut Manufacturing Performance Platform** from RedViking."*

-Geoffrey Bennet, GKN

Quick & Agile
Remote Access

- ⚠ Web based reports and KPI dashboards available on plant floor and remote devices
- ⚠ Notifications and alerts pushed to mobile, workstations and tablets: Manage a plant from anywhere
- ⚠ Remote access to data and reports: real-time management

Expansion Ready
Configurable for the Future

- ⚠ Start small and expand: Designed to grow with your business
- ⚠ Applications are easily updated and deployed to new locations
- ⚠ New applications are quickly added using common infrastructure to solve new problems

Global Scale
Enterprise Wide Scalability

- ⚠ Enterprise level connectivity: Launch Argonaut on premise, in the cloud or hybrid-cloud
- ⚠ Standardize with Argonaut: Process replication from line to line and plant to plant
- ⚠ Access to critical data & KPIs yields quality & throughput
