

## Regain for Excel to vCard Converter Working Guideline

Regain Excel to vCard Converter is a reliable and user-friendly tool designed to convert contacts stored in Excel files (.xls, .xlsx) into standard vCard (.vcf) format. It's an essential utility for users who need to import contacts from Excel sheets into mobile phones, email clients, or cloud platforms like Gmail, Outlook, iCloud, and more.

### What is the Use?

This [Excel to vCard Converter tool](#) simplifies the process of exporting large Excel contact lists to vCard format, which is widely supported by smartphones (Android & iPhone), Outlook, and other contact management applications. Instead of manually entering contacts, you can convert and import them in just a few clicks.

### Key Benefits:

- **Excel to vCard Conversion:** Converts Excel (.xls, .xlsx) contact data to standard .vcf format
- **Bulk Contact Conversion:** Supports batch conversion of hundreds or thousands of contacts
- **Field Mapping Feature:** Allows manual mapping of Excel columns to vCard fields (Name, Email, Phone, etc.)
- **Multi-Version Support:** Creates vCard files compatible with v2.1, v3.0, and v4.0 standards
- **Data Accuracy:** Maintains data integrity during conversion with no information loss
- **Supports All Devices & Apps:** Resulting vCards can be used on Android, iOS, Outlook, iCloud, Gmail, etc.
- **Easy-to-Use Interface:** No technical skills required – ideal for personal and professional use

### How to Use:

1. Launch the [Regain Excel to vCard Converter](#) tool.
2. Browse and load your Excel contact file (.xls/.xlsx).
3. Map Excel columns to vCard fields.
4. Choose the vCard version as per your need.
5. Click **Convert** to export contacts into .vcf format.

Regain Excel to vCard Converter offers a fast, accurate, and flexible way to move contacts across platforms.
