

# Regain for IMAP to IMAP Migration Tool Working Guideline

Regain IMAP to IMAP Migration Tool is a smart and efficient solution designed to transfer emails from one IMAP-enabled email account to another without any data loss. Whether you're switching hosting providers, migrating business email platforms, or consolidating mailboxes, this tool ensures a smooth and secure transition.

## What is the Use?

This [IMAP Migration tool](#) is used to migrate complete mailbox data (emails, attachments, folders) between two IMAP-supported accounts such as Gmail, Zoho Mail, Yahoo! Mail, Bluehost, GoDaddy, Amazon WorkMail, eM Client, AOL, and many others. It eliminates manual steps and technical complexity while offering reliable performance and accuracy.

## Key Benefits:

- **Direct IMAP to IMAP Migration:** Easily move mailbox data from one IMAP account to another
- **Supports All IMAP Email Platforms:** Gmail, Bluehost, eM Client, Zoho, Yahoo! Mail, AOL, Amazon WorkMail, GoDaddy, and more
- **Maintains Folder Structure:** Preserves original email folders and hierarchy during migration
- **Selective Migration:** Apply filters to move specific folders, email types, or date ranges
- **No Data Loss:** Ensures complete and accurate transfer of emails with attachments and metadata
- **Secure Authentication:** Supports OAuth 2.0 and MFA for safe login and data handling
- **Bulk Mailbox Transfer:** Migrate multiple accounts in a single session
- **User-Friendly Interface:** No technical expertise required

## How to Use:

1. Open the [Regain IMAP to IMAP Migration](#) Tool
2. Enter source and destination IMAP account credentials
3. Authorize access and select mailboxes or folders to migrate
4. Apply filters (optional) for selective migration
5. Click **Start Migration** to initiate the process

With support for major platforms and export formats like PST, EMLX, EML, PDF, MSG, MBOX, ICS, VCF, and more, Regain makes IMAP migration reliable, simple, and secure.
