

# Regain for NSF to Office 365 Migration Working Guideline

The **Regain NSF to Office 365 Migration Tool** is an advanced and reliable solution designed to help users migrate their Lotus Notes NSF (Notes Storage Facility) files to Microsoft Office 365. Whether you're moving from an on-premises Lotus Notes setup to Office 365 or migrating specific mailboxes, this tool provides a seamless, hassle-free method to transfer emails, contacts, calendars, tasks, and other critical data while maintaining its integrity throughout the process.

## Why Choose Regain NSF to Office 365 Migration Tool?

Migrating from Lotus Notes to Office 365 can be a complex and challenging task due to differences in formats and platforms. The Regain NSF to Office 365 Migration Tool simplifies this process by offering a quick, efficient, and secure method of transferring data without losing any important information. It is ideal for organizations looking to modernize their email infrastructure or for users migrating from Lotus Notes to the cloud-based Office 365 environment.

## How to Use the Tool:

1. **Download and Install:** Start by downloading the [Regain NSF to Office 365 Migration Tool](#) from the official website.
2. **Load NSF Files:** Open the tool and load the NSF files you want to migrate to Office 365.
3. **Select Office 365 Mailboxes:** Choose the target Office 365 mailboxes where you want to migrate your data.
4. **Preview the Data:** The tool will scan and display a preview of all the recoverable and migratable items like emails, contacts, calendars, etc.
5. **Start Migration:** Click the "Start Migration" button to initiate the transfer process. The tool will securely migrate your data to Office 365.
6. **Complete Migration:** Once the migration is completed, all your Lotus Notes data will be accessible in Office 365 mailboxes, and you can continue your work without any data loss.

## Key Features of Regain NSF to Office 365 Migration Tool:

- **Seamless Migration:** Migrates Lotus Notes NSF files directly to Office 365 without data loss or corruption.
- **Multiple NSF File Support:** Migrate multiple NSF files at once, saving time and effort during bulk migrations.
- **Complete Data Migration:** Transfers emails, contacts, calendars, tasks, and other mailbox data from NSF to Office 365.
- **Easy-to-Use Interface:** The intuitive interface makes it easy for users of all technical levels to navigate and migrate their data.
- **Mailbox Mapping:** Automatically maps mailboxes between NSF and Office 365 to ensure a seamless and accurate migration.
- **Selective Migration:** Allows you to select specific mailboxes, folders, or individual items for migration.

- **Free Trial Version:** Test the tool's functionality and performance with the free trial version before making a purchase.
- **Fast and Secure Migration:** Ensures quick migration without compromising on the safety or integrity of your data.

## Supported File Formats and Email Clients:

### File Formats Supported:
