

# Regain for Office 365 to Gmail Migration Working Guideline

**Regain Office 365 to Gmail Migration Tool** is a reliable and feature-rich solution for migrating mailboxes from **Microsoft Office 365 to Gmail (Google Workspace)**. Whether you're a small business transitioning to Google's ecosystem or an enterprise consolidating accounts, this tool ensures a fast, accurate, and secure migration of emails from Office 365 to Gmail without data loss or disruption.

---

## Why Migrate from Office 365 to Gmail?

Organizations often move from [Office 365 to Google Workspace](#) for simplified collaboration, better integration with Google apps, or cost-effectiveness. Manual migration can be complex, especially when handling large volumes of data or multiple user accounts. Regain offers an automated and user-friendly tool that streamlines the entire process, eliminating manual steps and ensuring a smooth transfer.

---

## Key Features:

- **Direct Office 365 to Gmail Migration** – Transfers emails, folders, and attachments from Microsoft 365 to Google Workspace.
  - **Multiple Account Support** – Perform bulk mailbox migrations efficiently.
  - **Retains Folder Structure** – Preserves the original folder hierarchy and metadata.
  - **OAuth 2.0 Secure Authentication** – Ensures encrypted and secure login for both Gmail and Office 365.
  - **Advanced Filters** – Migrate selected emails using filters by date range, subject, or sender.
  - **Progress Monitoring** – Real-time status updates and logs during migration.
  - **No Data Loss** – All content, formatting, and attachments are preserved during transfer.
- 

## How the Software Works:

1. **Launch the Regain Tool** – Start the [Regain Office 365 to Gmail Migration](#) software.
2. **Sign in to Office 365** – Authenticate securely using your Office 365 admin credentials.
3. **Sign in to Gmail Account** – Authorize the target Gmail/Google Workspace account using OAuth.
4. **Select Mailboxes** – Choose specific folders or complete mailboxes to migrate.
5. **Start Migration** – Initiate the transfer and monitor progress through the dashboard.

---
