“Boost your innovations today –  
And your visions for tomorrow”

# From Unstructured Data to a Future-Proof Analytics Platform

As the industry moves into the age of digitalization, company internal and external data is growing rapidly. The ability to keep track and ahead of competition lies in the information advantage.

With our analytics platform we implement cutting edge technologies without over-complicating things and allow your business to take competitive decisions on adequate data with a scalable analytic platform as foundation.

## Challenges

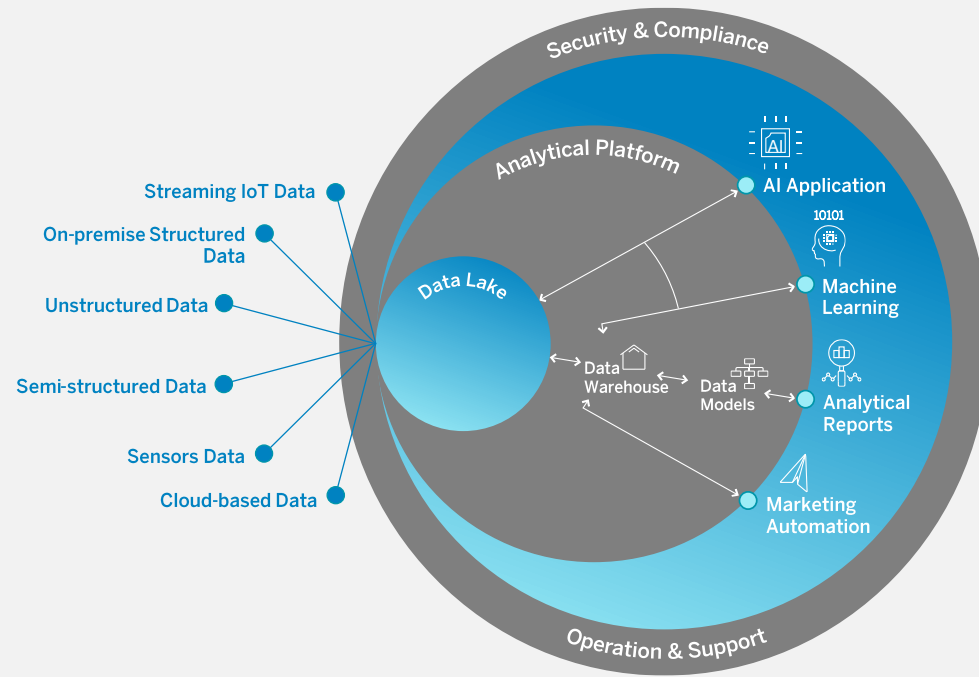

Our customers are present in all industries as digitalization and data growth require companies to make investments in analytic platforms to stay relevant.

## Ideal Solution

It's our strong belief that successfully creating a frictionless connection between data and human is where business data is turned into business intelligence.

## Desired Outcomes

With our analytics platform we implement cutting edge technologies without over-complicating things and allow your business to take competitive decisions with a scalable analytic platform as foundation.

# Reinsight

## Future-Proof Analytics Platform

We offer a secure, scalable and future-proof analytics platform based on Microsoft Azure that can import data from multiple sources such as on-premise data, streaming data and other cloud applications and enable reports and self-service BI applications.

### Data to Grow Your Business

Extract actionable insights from data and analysis to gain competitive advantage and drive profit. To become truly data driven, build a solid business intelligence platform from the ground up, customized for your organization.

### Industry Leading Technology

We strengthen our client's competence and drive initiatives around analytics platforms and BI investments. We have hands-on experience from SAP enterprise platforms and Microsoft cloud environments and a proven track record to deliver with quality.

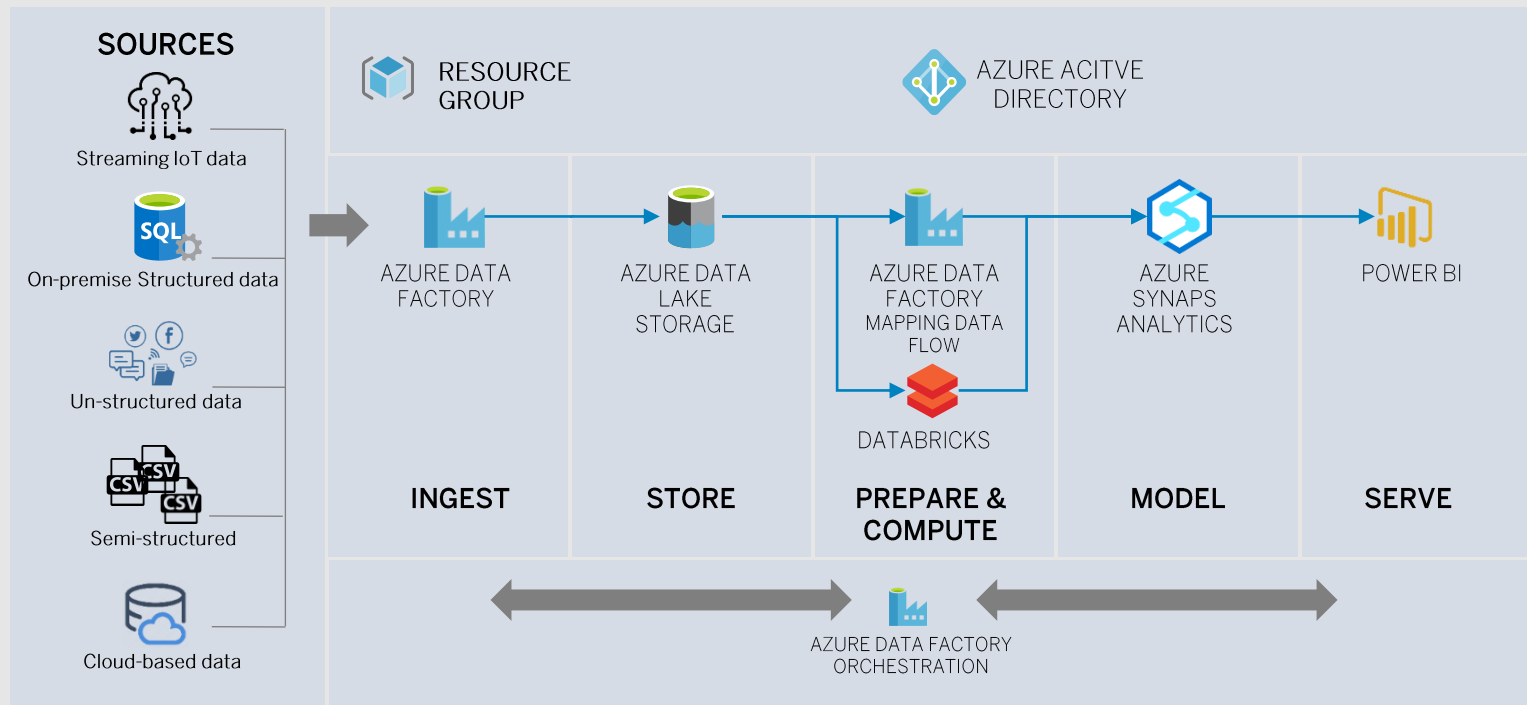

### Using Data to Predict the Future

To stay ahead of competition we need to predict what will happen. Use AI, machine learning and analysis to build models that continually learn and helps you predict how your customers will behave or when your equipment needs to be upgraded to avoid a production stop.

# Reinsight – Future-Proof Analytics Platform in Microsoft Azure

With our pre-defined packages and methods we can quickly provide you with an analytical platform in Azure that gathers your company data in a structured way and provides fast and insightful reports for you to share in your organization.

## Scalable

Think Big – Start Small!

Our analytics platform is elastic and grows together with your business and data requirements.

## Future-Proof

Continuous innovation from Microsoft—supports your development today, and your product visions for tomorrow.

## Trusted & Secure Platform

The robust security structure in the Azure platform, combined with our experience guarantees a platform tailored to your needs.

## Time-to-Market

We can provide a very short time-to-market thanks to our analytics platform concept, our experience and the wide range of services available in Azure.

# Customer Success:

## Söderberg & Partners Improved Financial Reporting and Forecasting

Söderberg & Partners (S&P) was founded 2004 and is one of the leading financial service providers in the Nordics, delivering services within insurance brokerage, insurance consulting and wealth management. S&P has been growing rapidly over the last years and during 2019 a group wide data and analytics platform was identified as a key enabler to meet business goals.

Reinsight was contracted in early 2020 to deliver an analytic platform based on Microsoft Azure to improve commercial decisions through data driven insights.

### Data Driven Decisions through consistent Data Platform

A group wide analytics platform in Microsoft Azure was delivered in 3 months providing a foundation for common insights and data driven decisions.

Since then several business units have adopted the idea and are now launched onto the platform.

### Improved Financial Reporting & Forecasting Process

S&P Norway have now been given new ways to measure and track their business units as well as integrated forecasting tools in Azure.

This has increased performance transparency and greatly reduced manual processing.

*"I am very pleased to work with Reinsight as a partner in this project. They have the technical capacity to deliver complex solutions at the same time as they understand financial models and terms".*

**Gard Vammervold Eriksen**

*CFO, Söderberg & Partners Norway*
