Relativity one

RelativityOne's secure cloud platform gives you the tools you need to tackle your unique challenges through every phase of a project.

Secure e-Discovery

Your data is safe with us. RelativityOne is designed to be the most trusted and reliable e-discovery solution your organization will ever use.

Investigative Approach

Use advanced analytics, machine learning, and visualizations to quickly sift through volumes of unstructured data and uncover the facts.

People-Centric Review

Get a better understanding of the people and relationships in your matter with intuitive ways to analyze communications across people and channels.

Comprehensive Platform

Gain access to all the tools you need at each step of the e-discovery process to ensure you can tackle even the most complicated cases. No risky data transfers required.
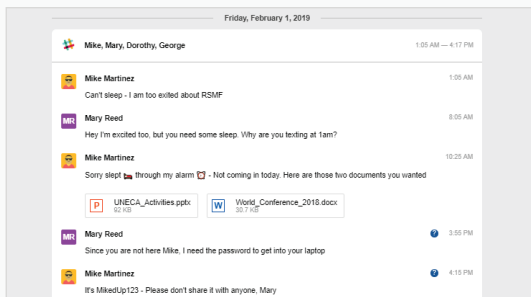

Flexible Data Management

Take full control of your data—from managing a repository for early case assessment or investigations to putting inactive matters into cold storage.
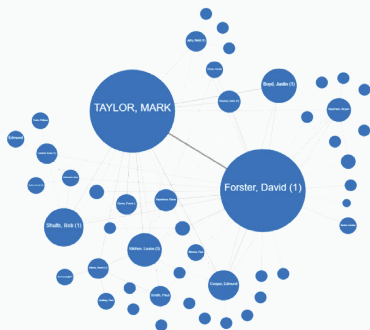

Conceptually visualize your data to narrow in on what's important, even with the most complex projects.

Seamlessly review, analyze, and produce short message data from mobile, instant messaging, and collaboration apps.

Explore communication networks across your matter to dig deeper into conversations. Learn who's talking to whom, how often, and what about.

Collect from Popular Cloud Technologies

Collect directly from the most popular enterprise technologies without ever leaving the cloud—so your data remains as secure as possible.

Cloud Elasticity

Keep up with performance during peak times, without the work or expense of buying, installing, and maintaining your own infrastructure.

Consistent Global Delivery

Deliver a consistent experience to your customers anywhere in the world and easily scale your services and solutions.

Flexible and Extensible

Create applications and automate workflows to meet different requirements of each case.

Within just four and a half months, FTI Consulting is supporting 35 projects consisting of nearly 20TB in RelativityOne.

Relativity Trust

When it comes to housing an organization's most sensitive data, there are no shortcuts. Only a fully integrated security program will do. Relativity goes far beyond standard data security and privacy certifications, giving you peace of mind that your data is safe with us.

Preventative Defense

- We've implemented a proactive approach to gathering intelligence and investigating and analyzing threats.
- Threat hunters cull through millions of events to identify suspicious or anomalous behavior.
- We protect against insider threats with user and entity behavior analytics and profiling.
- We monitor the dark web, hacker forums, and our own networks and systems for potential threats and vulnerabilities.
- We conduct internal and third-party vulnerability assessments to identify weaknesses.
- We promote an atmosphere of security awareness with all employees.

Automated Security Processes

- We use automated logging to increase the speed to identify and remediate issues.
- We employ a threat intelligence platform as our single source of truth for intelligence.
- All engineers adhere to a secure software development lifecycle.
- We continually scan our source code and enterprise assets to ensure vulnerabilities do not make it into RelativityOne.

Transparent Operations

- We are ISO 27001 certified and have achieved SOC 2, Type II attestation.
- Microsoft Azure meets more than 70 international and industry-specific compliance standards, such as ISO 27001; SOC 2, Type II; HIPAA; and FedRAMP.
- We regularly share insights with customers and can provide access to their relevant security logs.
- We are part of a community of cybersecurity professionals to share intelligence and elevate security practices.
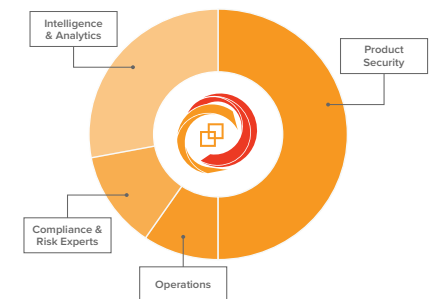

Calder7

Calder7, our security team, leads the charge with highly skilled engineers, analysts, and subject matter experts tasked with protecting your data.

Quick Facts

- Formed in January 2018
- Nearly **tripled in size** in the first 12 months
- Name was inspired by Alexander Calder's Flamingo sculpture that resides outside of Relativity's Chicago office
- Last year, the team culled through over **130 billion** events in RelativityOne
- We've had **ZERO severe incidents**

Calder7 is made up of more than 30 security experts

A Whole Community to Lean On

Sometimes, e-discovery takes a village—and we've got one built in.

Work with Experts

Get expert solutions from more than 120 global partners, including data management, business process transformation, and custom applications.

Meet and Share Knowledge

Join user groups across the globe and converge in Chicago for our annual e-discovery conference, Relativity Fest.

Get Trained and Certified

Online and in-person trainings, on-demand webinars, and 24-hour assistance are at your disposal. You can also get certified in everything from administration to infrastructure.

Rely on the Relativity Team

Make the most of the software with our customer success program. Our team will work with you every step of the way to ensure you're set up for success.

FOLEY
FOLEY & LARDNER LLP

"With an end-to-end platform, we can stay responsive to client needs. As more and more client data migrates to the cloud, RelativityOne will give our team better access to the data we need to more effectively represent our clients."

MIKE GAY
Chair of Litigation
