

# Cut Microsoft 365 security risk fast—pass audits and enable Copilot safely

## What our customers are saying

Within weeks we had clear visibility into our risks, quick wins implemented, and an executive roadmap. We moved from uncertainty to confidence—without disrupting users

## About Reliance Infosystems:

Reliance Infosystems helps organisations secure Microsoft 365. We deliver fast, low-disruption posture uplift and an executive-ready roadmap—so you reduce risk, satisfy audits, and enable hybrid work and Copilot safely.

## What we offer

The Microsoft 365 Security Confidence Accelerator is a focused engagement that shows you exactly where risk lives across identity, devices, apps and data—and helps you reduce it fast. We assess your configuration across Entra ID, Intune, Defender and Purview, identify the few changes that cut the most risk, and produce an executive-ready roadmap your team can deliver. You get:

- (1) a Security & Access Landscape Review,
- (2) a prioritised Risk Reduction plan with quick wins,
- (3) practical security patterns that won't slow employees down, and
- (4) a leadership briefing with next steps for secure hybrid work and Copilot readiness.

# Why Microsoft 365?

## Save your company money

Reduce costly incidents, audit remediation, and tool sprawl by using the security capabilities already included in Microsoft 365—implemented correctly and prioritised by risk.

## Scale your business quickly and flexibly

Standardised security patterns let you onboard users, devices and new workstyles faster—without reopening risk debates every time the business changes.

## Technical support

Get practical guidance that your team can execute: what to fix now, what to phase, and how to sustain improvements without creating daily admin overhead.

## Financially backed SLA

A strong Microsoft 365 foundation supports resilient operations—while your security posture becomes measurable, trackable and easier to govern.

## Simplified IT management

Move from inconsistent settings to policy-driven controls that are easier to manage, easier to explain to leadership, and easier to maintain over time.

## Key use cases

### Secure sign-in & access

Stop account takeover with strong identity controls and safer access rules.

### Managed & compliant devices

Ensure only trusted, healthy devices can reach company data—everywhere.

### Protected email & collaboration

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

### Data protection & compliance

Control sensitive data with clear classification, labels and policy-based protection.
