

RELIAQUEST GREYMATTER

MAKING SECURITY POSSIBLE WITH 24/7 ENABLEMENT

Incident Response

Is on hand 24/7 to monitor alerts, investigate incidents and automate responses or provide recommendations for remediation. Using our cyber analysis methodology & automation plays we provide consistent responses.

Content Engineering

Focuses on correlations and contextual development building out effective threat detection content tuned to your specific ecosystem. By recognizing existing & emerging IOCs and TTPs you can further reduce risks.

Security Engineering

Validates your security controls through continuously automated hunt campaigns and attack simulations to give you a true baseline understanding of your entire environment to identify gaps & prioritize remediation.

Delivery Management

Works together with your team providing actionable metrics benchmarked against your previous history & industry peers to help create a roadmap for SUCCESS that leadership can both understand and get behind!

SECURITY IS A TEAM SPORT

ReliaQuest partners with security teams to deliver unified visibility and high-fidelity threat intelligence to expedite investigations across all your disparate technologies. With ReliaQuest acting as an extension of your team we ensure that you utilize the full power of all security investments & continue to mature your program.

ReliaQuest equips your SIEM with content catered to your ecosystem enabling effective threat detection. We remove the hassles of content development, tuning, and updates with our library of threat detection logic so you can focus on business-critical decisions for improving your overall security posture. Our teams continuously focus on building out rules and optimizing all your security tools while you retain ownership of them.

- ▲ Visualize threat coverages across every major security framework including MITRE ATT&CK, Killchain stages, or NIST to identify gaps.
- ▲ Experience the impact of high-fidelity alerting and see an average ~50% reduction in mean time to resolve within the first 90 days.
- ▲ Generate tactical metrics to assess your security model to create a strategic roadmap for future improvements & measure your ROI.
- ▲ Gain greater visibility into your environment and leverage data on demand pulled from siloed technologies like SIEM, EDR, and Cloud.

“ ReliaQuest GreyMatter is the foundation for a best-in-class security program providing you with unified visibility, automation across the security lifecycle, and board-ready continuous measurements enabling your team to support the business smarter and faster. ”
