BI Book Planning features

Budget and forecast

Leverage continuously up-to-date data to plan and forecast your operational, financial, workforce and other budgets with surgical precision.

Build scenarios

Model different scenarios with unlimited dimensions, like location, expenses and customers. BI Book will create future budgetary, and scenario plans automatically.

Automate tedious tasks

Automate manual business processes and generate for instance balance sheet budgets and cash flow forecasts based on your P&L budget.

Collaborate with your team

Make sure that all key people are on the same page and work with the same numbers and one single truth. Work, comment on and share your forecasts and budgets easily.

Consolidate data

Integrate all important data into a single platform. Create budgets and forecasts for each of your groups company and consolidate them into one.

Save time

Spend less time on manual data consolidation and other mundane tasks. Use pre-built and automated workflows to reduce cycle times of budgeting and forecasting.

Work securely

Breathe easily knowing your work is backed up and secured always in a cloud service inside the EU. Say goodbye to lost files and wasted time.

Use the force of Power BI

BI Book planning is built within the most versatile Power BI analytics tool. You can build and edit budgeting templates based on your usual BI reports.

Technology supports in transforming finance

From

- Manual reporting
- Reporting historical results
- Long time before any action can be taken
- Multiple versions of the truth
- Work heavy peak times

To

- Driving business outcomes
- Future predictions and recommendations
- Short time to action
- Data driven culture
- Reduced or even eliminated peak times

Benefits for customers

Save time, money and effort with BI Book

BI Book was built for people like you. For professionals, who want to make informed decisions and lead with data, but don't want to spend a lot of time and energy on boring manual tasks.

Save time and effort

With BI Book, you don't need expensive Power BI licenses in-house. Pre-built connectors, data warehouses and report templates save a lot of money and time that can be spent elsewhere. We will give you access to top-level analytics within days or even hours – hassle free.

Mitigate risks

You can mitigate the risks relating to multiple truths by connecting all your business data into a single platform. Data siloes are removed and everybody is working with the same, up-to-date data. You can wave goodbye to double work, lost data and spending endless number of resources for nothing.

Save money

BI Book eliminates the need to buy expensive Power BI licenses in-house. Our premade connectors are quick and cost-effective to implement and thanks our extensive library of report templates, you don't need to spend money on customized reports if you don't want to.

100+ pre-built integrations (+ more are on the way!)

get.bibook.com

bibook

Despite the fact that we were working with two professional Dynamics CRM developers, we could not get the needed reports out of the systems in the time required. So, I started googling different options and found BI Book.

I reached out to them, even though there is a huge time difference between us. We started collaborating, and within two weeks, I had probably 15 financial reports giving me more information than I had ever had before.

Quick and easy

Together with the BI Book team, we have developed the right kind of modern reporting and analytics package for our needs.

From the results so far, it can be concluded that it has significantly helped our business in terms of KPIs, metrics, and other reporting needs.

Tailored solution to match company needs

Clarity to internal communications

Easier, faster and visually clearer reporting

Timo Eräkangas
CFO, Frosmo

With BI Book, financial performance management is convenient, and decisions can always be made based on up-to-date data. It is easier to identify bottlenecks in our processes and to see where to focus our resources.

The manual work involved in reporting has also been significantly reduced.

Management work has improved and made clearer

Reaction times to issues raised have dropped

Internal analytical knowledge has improved

Ville Mattinen
CFO, Valve

With the help of BI Book, we have purposefully developed accounting in such a way that we can closely monitor the costs and revenues of individual projects.

The service has been first-class, and we have always been able to be sure that things will be well done.

More accurate
project tracking

Project profitability has
increased
