Engage a two way chat between a console and client user to offer help or advice during the lesson.

Access

AUP

Acceptable User Policies for the user, shows the first agreed and last agreed information.

Logging and Blocking

Records URL history and allows you to take screenshots based on the keywords entered by the user. This module can also ignore specific URLs and keywords if desired.

Logging and Blocking

AI Driven Visual Threat Detection

Only Senso offers a visual threat intelligence feature as a standard component in its Safeguarding bundle, providing early stage actionable intelligence to protect students, identify potential victims and prevent harmful content.

Visual content is everywhere - you can view, save and share easier than ever before. Senso provides a unique solution with visual threat technology driven by categories not general image labelling.
