Since the foundation in 1996, operates in Italy and collaborates with other companies in the group that are Microsoft partners in Brazil, Germany, the United Kingdom and the United States.

See what customers are saying:

"With Microsoft Azure and Dynamics 365 is possible to implement a new way to approach a data-driven solution achieving velocity and control and engagement at the same time."

— Renzo Rognoni, Senior Enterprise Architect, Illimity Bank

WHAT WE OFFER

Dynamics 365 Suite (including D365 Customer Engagement and Customer Insights) helps banking company to unify, understand and exploit customer data and distribute them inside every CRM process, starting from customer care touchpoints towards each marketing campaign.

Dynamics 365 suite, with help of Cluster Reply, allows your bank to:

- Eliminate data silos and unify customer data.
- Guarantee a unified customer experience towards all channels with specific customer journeys that can be designed through an easy interface.
- Help customers in their decisions by automatically propose solutions that fits their needs
- Enable the best AI/Insights/KPI Data and share this information through all your employee
- Take advantage of habits, interests, and also problems related to your customer base.

1-day workshop powered by **Cluster Reply** will allow users to acquire initial notions and understand potentials about Microsoft Dynamics 365 suite.*

* The format, content and timing of the workshop will be assessed based on the specific needs of the customer.

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.
