Build & Automate Hackathon

WORKSHOPS

App in a Day • **Automation in a Day** • **Use Case in a Day** • **Envisioning** • **Governance Envisioning**

Get to know innovative low-code capabilities with interactive hands-on sessions for both the business areas and IT departments. A great opportunity for enablement and when you want to start rolling out the Microsoft Power Platform.

Strategic consulting, enablement & development with ❤️ made in Germany within the 🏃 Reply Group.

Power Platform Hackathon

🏢 **at your place** × **in a Reply office** × **online**

🕐 **regular duration 2-5 days**

⭐ **effort upon request***

👥 **audience from Business, IT**

Hackathon

Comprehensive introduction to Microsoft Power Platform with AI

Interactive tools (Power Apps, Power Automate, Power BI, Copilot)

Evaluation and implementation of MVPs or PoCs

Best Practices and Governance

Focus on team building and collaboration

Highlights of participation benefits and possible Microsoft sponsorship

Provision of training materials and deliverables

Input

Use Case Discovery Workshops

IT

Governance in a Day

Business

Microsoft Copilot Studio in a Day

App in a Day

Automation in a Day

Output

Next Steps

In a hackathon, everyone is welcome!

Citizen Developers

- Incorporate deep process knowledge directly from the business departments
- Digitize your own processes quickly instead of waiting a long time for the IT department to get busy
- Actively participate in the design of the user interface and processes
- Have fun with the Power Platform by getting started easily

Pro Developers

- Learn where to marry low-code with pro-code
- Extend and scale the Power Platform with C#, JavaScript, and Azure components.
- Provide technical information, e.g. interfaces and custom connectors, infrastructure and more

Head of Departments

- Manage apps, workflows, and environments
- Get entry points and opportunities to digitize his department to increase efficiencies
- Understand billing, licensing, and database capacity features
- Learn about security, teams and Azure

Central IT Department

- Learn how to control the Power Platform to create a secure, managed low-code platform
- Learn the first steps to implementing a Center of Excellence Starter Kit
- Anchor the Power Platform in your core IT strategy
- Understand licensing and release
- Deploy centralized deployment pipelines

Spectrum of Roles and People

Hackathons are scalable, but we recommend a group size of max. 6-7 people per use case to be able to answer individual questions and to exercise training on the job. With us, everyone is invited – from the business department to the central IT department to decision makers.

Hackathon at Reply

Benefit from parallel and targeted training from our established training concept - in addition to intensive knowledge transfer from our valuable best practices. We coordinate this individually with you.

Governance, Community, Licenses

Our hackathon doesn't stop at an implementation of use cases. We are also happy to advise you on Center of Excellence (governance, compliance), licenses and a community concept.

Governance in a Day

🏢 at your place ✖ in a Reply office ✖ online

🕐 regular duration 1 day

⭐ effort 3 days

👥 audience from Central IT, first Key Users

⭐ Transform your business with Microsoft Power Platform

From environment management and Dataverse security to comprehensive data protection. Learn enterprise-grade strategies for access control, third-party integration, and robust DLP policies. Leverage the Center of Excellence Starter Kit and implement professional Application Lifecycle Management.

Outcome

🎯 Clear Power Platform strategy and roadmap

⚛ Defined processes and role assignments

⚙ Productive departmental adoption

💼 Guidelines for enterprise-scale applications
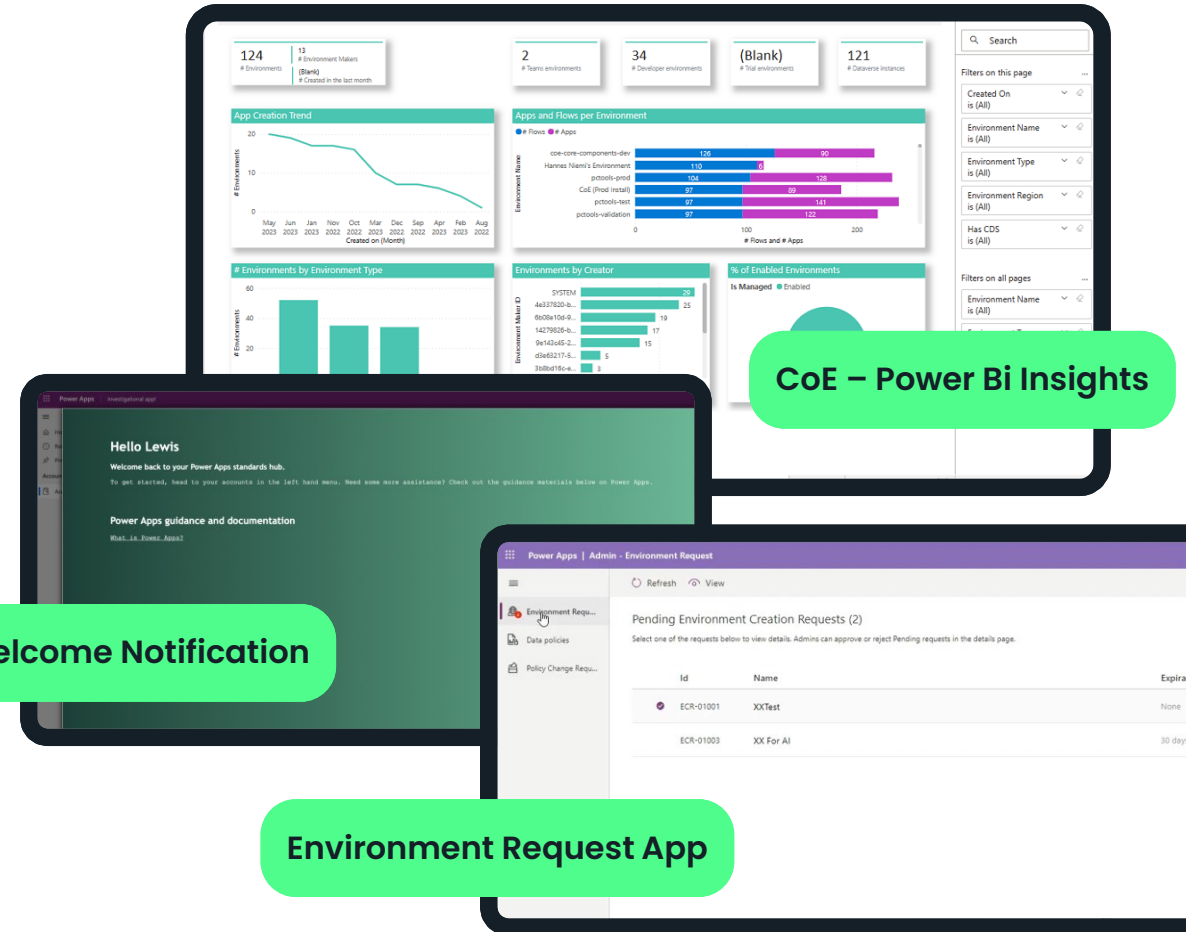

🧩 Structured development environments

🧠 Fusion teams combining Citizen & Pro developers

📄 Comprehensive DLP policies implementation

🚀 Enhanced cross-team collaboration

CoE – Power Bi Insights

Microsoft Copilot Studio in a Day

at your place ✕ **in a Reply office** ✕ **online**

regular duration 1 day

effort upon request*

audience from Central IT, first Key Users

Transform your business with Microsoft Power Platform & AI

Empower your team to build AI agents, intelligent apps, workflows, chatbots, and unlock data insights – all without complex coding. Get hands-on training, create rapid prototypes, and accelerate your digital innovation.
Includes Microsoft sponsorship opportunities and complete learning resources

Outcome

Learn how to implement AI-chatbots

Solve problems and provide 24/7 answers

Use chatbots for real-time responses to questions

Automate tasks to optimize digital workforce efficiency

Easily connect to **1500+** different systems

Govern ownership and sharing automations
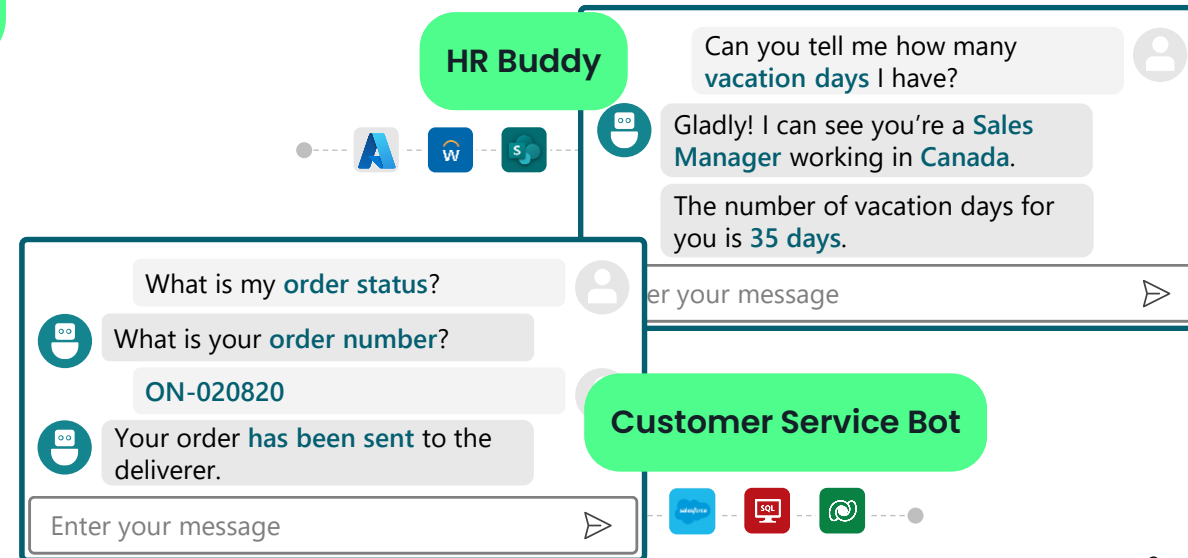

Boost employee productivity and create digital co-workers

Analyze processes for optimization and new use cases

* Microsoft sponsoring possible

Product Assistant

Is my spare part compatible with product XY?

What is the serial number of your spare part?

My serial number is SN-100820

Yes, the spare part is compatible.

Enter your message

HR Buddy

Can you tell me how many vacation days I have?

Gladly! I can see you're a Sales Manager working in Canada.

The number of vacation days for you is 35 days.

...er your message

What is my order status?

What is your order number?

ON-020820

Your order has been sent to the deliverer.
