- Gain Clarity
- Identify Key Opportunities
- Receive a Clear Plan
- Prepare for Growth

Effort / Price

- up to five (5) days (remote)
- blanket price: 5000.- € (plus tax)

Intune Assessment Service

Evaluation and Strategic Planning

The Intune Assessment Service starts with a thorough evaluation of your current IT environment, followed by strategic planning to ensure that your organization is well-prepared to leverage Microsoft Intune for device management.

Comprehensive Evaluation:

- **IT Environment Review:** Conduct an in-depth review of your existing IT infrastructure, focusing on current device management practices and tools

- **Security Posture Assessment:** Evaluate your organization's current security setup, identifying potential vulnerabilities and areas where Intune can enhance protection

- **User and Device Profiling:** Analyze user roles and device types to understand how they can best be managed using Intune, ensuring a tailored approach that meets your specific needs

Strategic Planning:

- **MDM Strategy Development:** Assist in developing a strategic plan for mobile device management (MDM) using Intune, aligned with your business objectives

- **Implementation Roadmap:** Provide a high-level roadmap that outlines the steps your organization would need to take to transition to Intune effectively, including training schedules and key milestones

- **Future-Proofing Strategy:** Offer guidance on how to ensure your device management strategy remains flexible and scalable, preparing your organization for future growth and technological advancements

Intune Assessment Service

Training and Knowledge Transfer

The second phase of the Intune Assessment Service focuses on empowering your team with the knowledge and skills needed to effectively manage devices using Microsoft Intune.

In-Depth Training:

- **Introduction to Intune Capabilities:** Conduct comprehensive training sessions to familiarize your IT staff with Intune's capabilities, features, and best practices

- **Security and Compliance Training:** Educate your team on how to use Intune to enhance security and maintain compliance with industry regulations, including setting up policies and managing device security

- **Application Management Best Practices:** Provide guidance on how to manage applications within Intune, including deployment strategies, updates, and monitoring

Knowledge Transfer:

- **Training Materials:** Provide training materials, tailored to your organization's specific needs and challenges

- **Support and Q&A:** Offer post-training support and Q&A sessions to address any questions or challenges your team may encounter
