DATA GOVERNANCE ASSESSMENT - GAIN CLARITY AND CONTROL OVER YOUR SENSITIVE DATA

What we offer

The Data Governance Assessment is a structured consulting solution that evaluates how organizations discover, classify, protect, and govern data across Microsoft 365 and Azure.

It uses Microsoft Purview features such as data discovery, sensitive information detection, labeling insights, and DLP reporting to analyze data locations, usage, and existing controls. Customers receive a clear view of data risks, governance gaps, and compliance exposure.

The solution is differentiated by combining Microsoft-native telemetry with expert interpretation, avoiding generic questionnaires. It integrates directly with Microsoft 365 workloads and Azure services, leveraging built-in security and compliance capabilities to deliver actionable, prioritized recommendations and a practical roadmap.

What our customers are saying

"The assessment provided immediate transparency into our data risks and clear, actionable guidance on how to strengthen data governance with Microsoft Purview."
