

# ACCELERATE SECURITY OPERATIONS WITH AI

## What we offer

Accelerate security operations with Microsoft Security Copilot is a structured assessment to identify where Microsoft Security Copilot can deliver measurable value within existing security operations.

We review investigation workflows, roles, tools, and available data to assess readiness and derive relevant usage scenarios - independent of the underlying SIEM/XDR platforms.

Microsoft Security Copilot is evaluated as an intelligence layer to enrich investigations through natural-language interaction and contextual analysis across Microsoft and third-party signals. The outcome is prioritized use cases and actionable recommendations as decision support for adoption - without changing the current security architecture.

## What our customers are saying

"The Security Copilot Assessment gave our security team clear visibility into where Security Copilot truly adds value. We now have prioritized use cases and a solid basis for improving efficiency – without changing our existing SIEM – awesome!"

# FROM WORKFLOW ANALYSIS TO ACTIONABLE MICROSOFT SECURITY COPILOT USE CASES

## Why Microsoft Security Copilot?

Microsoft Security Copilot brings GenAI directly into security operations, enabling analysts to investigate, triage and respond to incidents more efficiently using natural language. It acts as an intelligence layer across Microsoft Security solutions and existing security tools, improving visibility, consistency, and decision-making. We leverage Microsoft Security Copilot in this assessment to help you understand using measurable value and how to adopt securely, responsibly and independently of your existing SIEM and XDR architecture.

## Assessment Activities

- Review of existing investigation workflows and roles.
- Analysis of available security signals and data sources.
- Identification of relevant Microsoft Security Copilot usage scenarios.

## Customer Value

- Clear visibility into where Microsoft Security Copilot adds value.
- Validated understanding of data and readiness.
- SIEM- and XDR-independent assessment results.

## Engagement Details

Duration	2 days
Cost:	€ 2.990
Countries:	DACH, EU
Technologies:	Microsoft Security Copilot
Company Size:	SME&C
Industry:	all
