

WORKSHOP ABOUT DIGITAL SOVEREIGNTY & REGULATORY COMPLIANCE

What we offer

Our workshop about Digital Sovereignty & Regulatory Compliance is a structured assessment engagement to evaluate compliance, security, resilience, and digital sovereignty requirements across your existing cloud and productivity environment. In a guided session, we review current configurations, governance controls, and architectural decisions to identify gaps, risk areas, and dependencies related to data residency, operational control, and regulatory alignment.

Findings are mapped against defined security baselines and relevant Microsoft technologies, including Microsoft Azure, Microsoft Entra ID, Microsoft Purview, Microsoft Defender, Microsoft Sentinel, and Microsoft 365 compliance capabilities. The engagement concludes with documented findings and prioritized focus areas to support informed decision-making and next steps.

About Reply

Reply brings together digital transformation experts and Microsoft technology enthusiasts who design and deliver high-value solutions to drive business forward. Reply has been a Microsoft Partner for over 25 years and a multiple-time "Partner of the Year" award winner. As a global Microsoft Partner, Reply currently holds all solution designations and 19 different specializations spanning Cloud & AI, AI Business Solutions, and Security.

What our customers are saying

"The workshop provided a clear and structured view of our compliance and sovereignty posture. The assessment helped us identify gaps quickly and gave us a solid foundation for informed decision-making."

Director Cloud Architecture, International Financial Company

GAIN VISIBILITY INTO COMPLIANCE, REGULATORY REQUIREMENTS AND SOVEREIGNTY CONTROLS

Why Digital Sovereignty with Microsoft?

Digital sovereignty with Microsoft means full control without compromise.

With Microsoft Purview, organizations gain unified visibility, protection, and governance of their data across cloud, on-premises, and AI workloads—fully aligned with regulatory and data residency requirements. Sovereign controls, customer-managed keys, and built-in compliance make trust, transparency, and innovation possible at scale.

Agenda Description

- Regulatory and sovereignty requirements overview
- Review of Microsoft 365 and cloud security settings
- Gap analysis and solution mapping

Solution Features/Value

- Structured compliance and sovereignty assessment
- Mapping to Microsoft security baselines
- Documented findings and priority areas

Engagement Details

Duration: 2 days

Cost:	€ 2.990
