Let us help you formulate an Azure-based artificial intelligence strategy

ABOUT CLUSTER REPLY:

Cluster Reply specializes in consulting and system-integration services powered by Microsoft technologies. We are eager to innovate and help your organization succeed in its digital transformation journey.

Use cases for your AI strategy

Knowledge mining via Azure Form Recognizer | smart vision | anomaly detection in predictive maintenance | time series analysis | natural-language processing | speech analysis | recommendations

WHAT WE OFFER

Artificial intelligence (AI) and machine learning can empower your business processes and help you improve performance. Cluster Reply, an Italy-based company in the Reply network, can help you maximize the impact of these technologies.

Through the support of our machine learning and AI experts, we can provide a briefing on how AI and machine learning can fulfill your organization's needs—and even identify scenarios where your customers can gain value.

During the briefing, we can analyze interesting use cases that feature Azure Cognitive Services and Azure Machine Learning approaches our experts have utilized.

Our briefing is designed so that both technical and nontechnical users can understand the AI and machine learning framework and define a roadmap for its adoption.

Why Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
