Identity Security with Microsoft Entra ID

Reply's security approach with Microsoft Entra ID helps organizations reduce identity-driven risk, meet compliance expectations, and speed up secure enablement of users, , Microsoft 365, Dynamics 365, Azure and 3rd party cloud apps with a clear, low-disruption path to modern authentication and standardized access policies across environments.

How "Zero Trust @ Reply" empowers organizations with Microsoft Entra ID

We centralize access decisions in **Microsoft Entra ID**, define a hardened baseline, and **prove changes safely** in report-only pilots before enforcement. We standardize the way policies are authored, tested, and documented so your teams can **operate with confidence** and scale the same patterns everywhere. Where stronger authentication or admin controls are needed, we provide **options, trade-offs, and a phased adoption plan** that fits your devices, workforce, and budget..

By automating policy deployment and documentation, we improve consistency and auditability, reducing operational risk while keeping tooling lean.

Customer Benefits

Risk reduction you can measure: fewer high-risk sign-ins, stronger session assurance, reduced privilege exposure

Compliance support: ISO 27001-aligned access policies and evidence (who can access what, under which conditions) in a standardized template

Scales across environments: consistent patterns that replicate across subsidiaries, regions, and clouds without reinventing controls

Faster secure enablement: accelerate app/user onboarding with pre-defined guardrails and report-only validation

Practical roadmap to phishing-resistant MFA: we help you sequence the move, including device and platform considerations, without a disruptive rollout

Secure foundation for Microsoft 365: Customers using Microsoft 365, Dynamics 365 or Azure benefit by increased security at the identity foundation

Outcome

- Phased MFA adoption plan
- Scalable access templates
- Least-privilege governance
- Measurable risk reduction
- Report-only pilot results
- ISO 27001-aligned policies
- Faster secure onboarding
- Reduced admin overhead

Deployment Phases

- **Phase 1:** Assess and plan
- **Phase 2:** Design policies
- **Phase 3:** Implementation as Code
- **Phase 4:** Report-only -> Enforce

Pricing

- **Assessment: 11.000€**
- **PoC: 11.000€**
- **Workshop: 11.000€**
- **Implementation: 15.000€ - 50.000€**

- **Prerequisite: Microsoft Entra P2 licenses (Can be provided separately by Reply as CSP Reseller)**
