CENTRALISE YOUR WORKFLOWS WITH WM'S INTEGRATED APPROVAL HUB
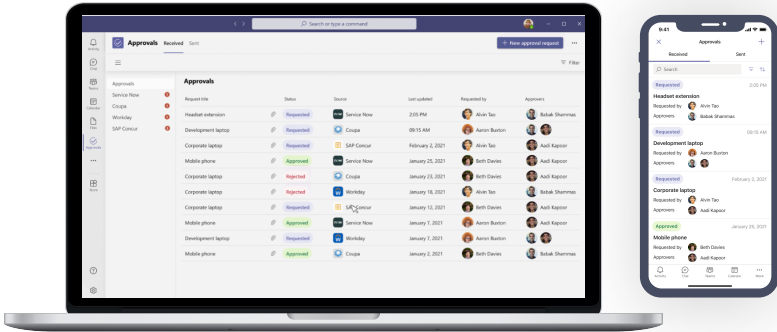

Tired of switching tabs? View all requests easily within one location with the Approval Hub - a centralised approval area to instantly approve or decline requests from within Teams.

1. User creates a request via a third-party cloud system, adds an approver, and submits the request

2. The approver gets a Teams notification for the request

3. The approver can approve, reject, or request more details

4. The action of the approver is pushed back to the request app

5. The request is either approved or denied and closed out

AUTOMATE YOUR WORKFLOWS WITH OUR INTEGRATED DIGITAL APPROVAL SYSTEM FOR MICROSOFT TEAMS

Save time

Provides reassurance that no requests missing from sight

Centralise approvals

Standardise approvals
