

ELITE REPORTING PLATFORM

Fully customizable reporting and analytics platform

Elite is a web-based software application which fully automates data processing workflows and offers rapid generation of multidimensional reports from diverse and heterogeneous data sources so that you gain insights into your business and comply with the latest regulations.

Annual financial statements. Periodic financial statements

Half-yearly accounting reports

Financial exposures status for banking and non-banking institutions

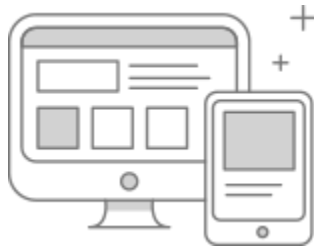

Own funds requirements calculations

Key financial performance indicators status

Loan loss provisioning

Profitability ratio analysis

Compliance reporting

REPORT GENERATION

Easier than ever: load the data, launch the workflows and automatically generate your reports.

CROSS-CHECK VALIDATIONS

Business formula validations are run against correlated reports and you can make adjustments from a friendly user interface.

FILE GENERATION

After the reports are adjusted and validated you may export them in the required format: Excel, XML, XBRL, TXT, CSV, etc.
