Resco for Power Platform

Build business apps for frontline scenarios. Faster

Implement data collection, document generation, and knowledge sharing capabilities into your Power Platform solution, all without requiring coding and ongoing maintenance.

Enhance Power Platform with advanced mobility

Level up your apps with digital forms, guides, and document automation. Take advantage of native integration with Power Platform and utilize all its innovations including AI.

Use what you need, grow without constraints

Choose a solution relevant for your business. Make the project ready for any number of users, industries, and use cases. Add new solutions at any time, knowing they are all compatible.

Reduce time to market, increase ROI

Use Resco Solutions on Power Platform instead of building from scratch. Save resources, speed up development and decrease maintenance costs.

Futureproof your projects

Building in the Power Platform ecosystem means you can count on the longevity of your projects. The platform is evolving with your business, and you can take advantage of the latest innovations - not only from Microsoft but also from the community of independent software vendors including Resco.

Resco Forms+

Create forms to collect field data in Power Platform

Conduct surveys, audits, and inspections, and use guided workflows, directly in Power Apps and Power Pages. Deploy libraries of complex forms in hours, not months. Design in a simple drag-and-drop interface. Fit your specific industry and use-case.

Tackle frontline scenarios

Design or import any form for collecting data, including checklists, work protocols, digital surveys, inspections, risk assessments, or machinery audits. Modify and re-use your forms for multiple projects. Make versions for different roles, localize them into multiple languages, configure for various use cases.

Collect data on the go

Improve the way frontline workers collect data. Make the forms easy to fill and available in Power Apps exactly where and when they are needed. Enhance work accuracy and speed. Publish forms on Power Pages for contractors or external users.

Get valuable business insights

Use guided workflows to increase the quality of data you collect. Access the data in real time. Feed it into Power BI or use it to train your AI applications and services. Apply the insights and improve your operations.

Maximize user adoption

Take advantage of advanced functionalities and customize your project to fit specific user needs, preferences, and workflows. Make creating forms and collecting data accessible to a wide range of users, including those with non-technical backgrounds.

Resco Docs+

Automate document generation and delivery in Power Platform

Combine Dataverse and field data to automatically create invoices, contracts, and reports in PDF or any format you choose. Use Power Automate to build flows for automatic document creation, data population, and distribution.

Handle documents and reports with one solution

Create and export invoices, work orders, machinery status updates, or service reports both on desktop and mobile. Set everything up in a simple drag-and-drop interface.

Design unified pixel-perfect documents

Create documents from scratch or use customizable templates. Generate every document in line with your company's design guidelines.

Save time and resources

Populate your documents with data from various sources. Set up automation flows to generate reports automatically even for multiple records in your Dataverse. Make rules for sending your documents to e-mail or uploading them to SharePoint.

Resco Steps+

Access and transfer field knowledge in Power Platform

Create step-by-step instruction guides with text, images, and videos to prevent errors and speed up onboarding. Make them available exactly where frontline workers need them. Use AI to assist you in building a knowledge library.

Close the skills gap

Improve knowledge transfer throughout your organization and make sure critical information is not lost. Let the workers capture tribal knowledge and continuously improve your knowledge base.

Document complex tasks and capture the experience of senior employees.

Speed up onboarding and training

Onboard new employees with standardized, structured and localized training manuals. Make all needed information accessible on the go in Power Apps or on Power Page portals. App users can rate the guides and provide feedback to the editors in the back office.

Create guides quickly

Build instruction guides in hours, not weeks. Use the simple and flexible interface to create intuitive and straightforward materials that make sense. Create and manage visual guides, task instructions, machine manuals, troubleshooting scenarios, or repair guides.

Improve first-time fix rate

Provide guides to workers at problematic points of their work process. Prevent errors with standard operating procedures. Reduce downtime and increase productivity of the frontline team. Achieve higher quality outcomes and fewer reworks.
