

Azure Migration Workshop

Microsoft Azure provides a modern, secure, and feature-rich range of services to host your business applications and data.

Knowing where to start the journey of migrating from on-prem to public cloud can be overwhelming. This workshop is designed to uncover key insights from your existing environment, and future state value that can be achieved from an Azure Migration.

Let RES. Business IT start your journey to leveraging the best of the Microsoft Cloud Platform.

Navigating a cloud migration is complex.

As an experienced Azure Deployment Partner, we'll make sure you avoid the common roadblocks that cause cloud adoption initiatives to stall or fail before they even start.

The Azure Migration Workshop leverages RES. Business IT's extensive real-world experience of assisting businesses move to the cloud.

The workshop will focus on understanding your business objectives and pain points, as well as your infrastructure and business application landscape. RES. Business IT will outline an actionable roadmap with the next steps to kick-start your migration project.

Starting with a clear understanding of your specific needs and environment will not only increase the chances of project success but also uncover business benefits that are available by modernising key workloads and applications.

The Workshop Process

RES. Business IT will provide access to skilled consulting and engineering resources to engage with you in a flexible workshop format.

The agenda will include the following:

- Reviewing business objectives and pain points
- Discussing the architecture of your current environment
- Discovering key business applications, user patterns and access requirements
- Envisioning the project approach, future state, and defining next steps

After the discovery workshop, you will have a plan to start your migration to Azure process, either independently or with additional assistance from RES. Business IT.

SOLVING YOUR ISSUES TODAY.
AND YOUR STRATEGY FOR TOMORROW.
