

Board-Ready AI Governance Intelligence. In Hours, Not Months.

Every organisation uses AI. Most cannot govern it. The EU AI Act enforcement begins August 2026, and organisations that lack structured governance face regulatory exposure, reputational risk, and operational blind spots. Revue-ai delivers governance readiness assessments and risk intelligence that give boards the clarity to act — in hours, not months.

AI Governance Reports

Report	What You Get	Turnaround	Price
AI Governance Readiness	15-20 page maturity assessment scored against EU AI Act, UK DSIT, ISO 42001	4-8 hours	from \$449
AI Risk Intelligence	25-30 page risk register with severity scoring, regulatory exposure mapping, board briefing	4-8 hours	from \$629
AI Governance Pulse	Instant governance readiness check across 5 dimensions — no sign-up required	Minutes	Free

Enterprise and volume pricing available on request.

Regulatory Framework Alignment

Framework	Status	Revue-ai Coverage
EU AI Act	Enforcement begins Aug 2025, full compliance Aug 2026	Risk classification, compliance gap analysis, remediation roadmap
UK DSIT	5 principles embedded in sector regulation	Principle-by-principle assessment, sector-specific guidance
ISO/IEC 42001	Certifiable AI management system standard	Maturity scoring against ISO requirements
NIST AI RMF	Voluntary US framework, increasingly referenced	Risk management alignment scoring

8 Governance Dimensions Assessed

- **AI Strategy & Leadership** — alignment of AI initiatives with organisational strategy and board-level oversight
- **Risk Management & Assessment** — identification, scoring, and mitigation of AI-specific risks
- **Regulatory Compliance** — readiness against EU AI Act, UK DSIT, ISO 42001, and sector-specific regulation
- **Data Governance & Privacy** — data quality, lineage, consent management, and privacy-by-design practices
- **Ethical AI & Fairness** — bias detection, fairness testing, transparency, and explainability frameworks
- **Accountability & Oversight** — clear roles, audit trails, escalation paths, and human-in-the-loop controls
- **Operational Maturity** — model lifecycle management, monitoring, incident response, and change control
- **Third-Party AI Management** — vendor assessment, supply chain risk, and contractual safeguards for external AI

Revue-ai vs Traditional Governance Reviews

	Traditional Consulting	Revue-ai
Timeline	3-6 weeks	4-8 hours
Cost	\$50,000+	From \$449
Output	Policy framework (shelf-ready)	Scored, board-ready, actionable
Evidence	Manual assessment	Evidence-traced findings

Why Organisations Choose Revue-ai for Governance

- **Regulation-aware analysis** that maps your current state against EU AI Act, UK DSIT, ISO 42001, and NIST AI RMF
- **Three-tier quality assurance** with an 80/100 threshold ensuring every assessment meets consulting-grade standards
- **Evidence-traced findings** so your board and auditors can see exactly what each recommendation is based on
- **Repeatable and scalable** — re-run assessments quarterly to track governance maturity over time

Built for Enterprise

- **Azure hosted** in UK South region, GDPR aligned, with AES-256-GCM encryption at rest
 - **Customer data never used** for AI model training — your documents remain yours
 - **Multi-tenant isolation** with row-level security ensuring complete data separation between organisations
