REXILIENCE

Enhance Cybersecurity Posture with
SCORE

The Ultimate Cybersecurity Solution

Cybersecurity Challenges for Small and Medium Enterprises

Rising Cyberattacks on SMEs

Limited awareness, lack of cost-effective tools.

Traditional Cybersecurity Assessments

Often complex and ignoring organizational risks

Regulatory Compliance Challenges

DORA and NIS2 requirements impact

**Security Challenges in Supply Chain**

Need to assess suppliers' cybersecurity posture

SMEs and large corporations face increasing cyber risks and compliance challenges, while complex tools and generic solutions often fail to meet specific needs and regulatory standards, hindering effective cybersecurity

SCORE – A Cybersecurity Solution

SCORE (Security and Compliance Overall Risk Evaluation) is a user-friendly, cost-effective SaaS solution delivering comprehensive cybersecurity assessments with actionable insights for different organizations
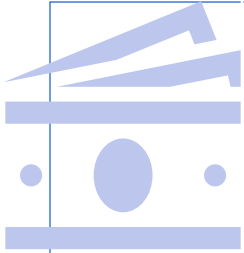

User-Friendly and Cost-Effective
SCORE offers a user-friendly interface that requires no installation or technical knowledge, making it accessible to all organizations at all levels.
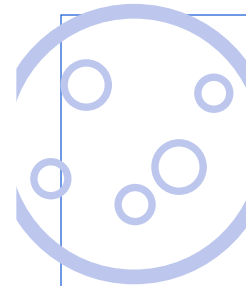

Comprehensive Cybersecurity Assessment
Tailored to meet the needs of SMEs, banks, insurance companies, and large corporations, SCORE provides a valuable evaluation of cybersecurity risks, particularly for companies with a limited digital footprint.
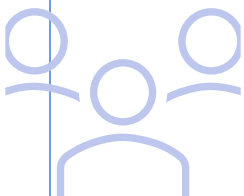

Multi-User, Multi-Tenant SaaS Solution
SCORE supports multiple users within an organization and operates on a multi-tenant architecture, allowing partners to use the platform efficiently.
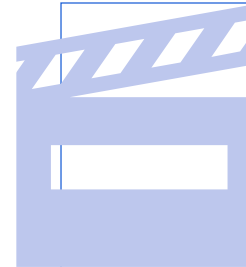

Actionable Recommendations
The solution provides clear, jargon-free, actionable recommendations through solution cards, helping organizations to enhance their cybersecurity posture systematically.

SCORE's Core Components: Questionnaire, Vulnerability Test, and OSINT

Cybersecurity Risk Evaluation
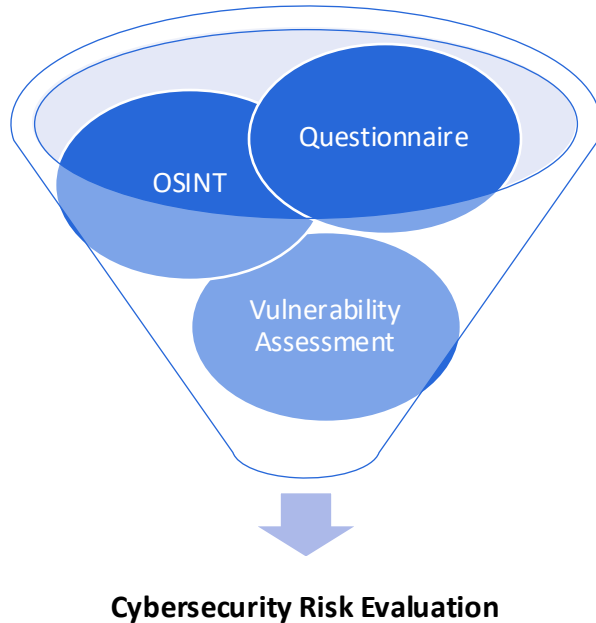

This **SaaS solution** is built upon **three pillars**:

1. **A questionnaire** tailored to assess the organizational aspects of a company's cybersecurity.

2. **A vulnerability test** designed to mimic potential attacker strategies, enabling prompt remediation of possible vulnerabilities.

3. **Open-Source Intelligence (OSINT)** that scans the dark web for threat information, aiding in the prevention of potential attacks.

These pillars are individually evaluated and consolidated into a **single overall index**, ensuring a robust and seamless evaluation.

Continuous Evolution of SCORE and Packages

With evolving cyber threats, our solution continually integrates the latest technology, adding new features to stay ahead of these evolving threats

Standard

- One repeatable run generating a comprehensive report
- Currently Available

Monitoring

- Standard plus monthly monitoring of vulnerabilities and OSINT
- Release: November 2024

Tutor

- Monitoring plus an interactive AI cybersecurity tutor for the solution cards
- Release: January 2025

Tailored Cybersecurity Benefits for Different Organizations

For SMEs

Delivered Via SaaS, no Installation Required

User-friendly interface, no technical expertise needed

Cost-Effective

Holistic view of cybersecurity posture

Quick results within the hour

GDPR Compliance

For Banks

- Facilitates DORA Compliance
- Enhance Credit Assessment with cyber risks

For Insurance Companies

- Enables risk assessment for cyber policies
- Supports DORA Compliance

For Large Corporations

- Improves Third-Party Risk Management
- Eases NIS2 Compliance
