#BEYOND_CYBERSECURITY

Enhance Cybersecurity Posture with **SCORE**

The Ultimate Cybersecurity Solution for Your Business

Cybersecurity Challenges for Small and Medium-Sized Enterprises

Increasing Cyberattacks on SMEs

82% of ransomware attacks target companies with fewer than 1,000 employees

Challenges in Regulatory Compliance

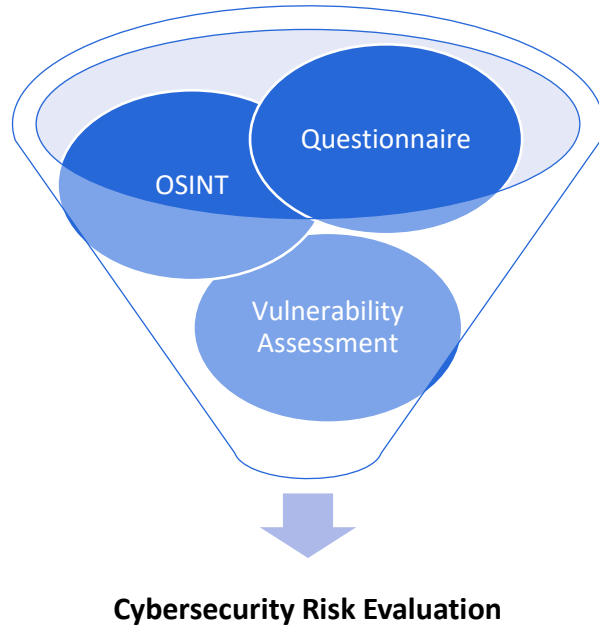

150,000 organizations are affected by NIS2, and over 22,000 financial entities must comply with DORA

Security Challenges in the Supply Chain

98% of organizations have relationships with at least one third-party that has experienced a breach in the past two years

SMEs and large corporations face increasing cyber risks and compliance challenges, while complex tools and generic solutions often fail to meet specific needs and regulatory standards, hindering effective cybersecurity

SCORE's Core Components: Questionnaire, Vulnerability Test, and OSINT

This **SaaS solution** is built on **three pillars**:

1. A **questionnaire** tailored to assess the organizational aspects of a company's cybersecurity.
2. A **vulnerability test** designed to mimic potential attacker strategies, enabling prompt remediation of identified vulnerabilities.
3. **Open-Source Intelligence (OSINT)** that scans the dark web for threat information, aiding in the prevention of potential attacks.

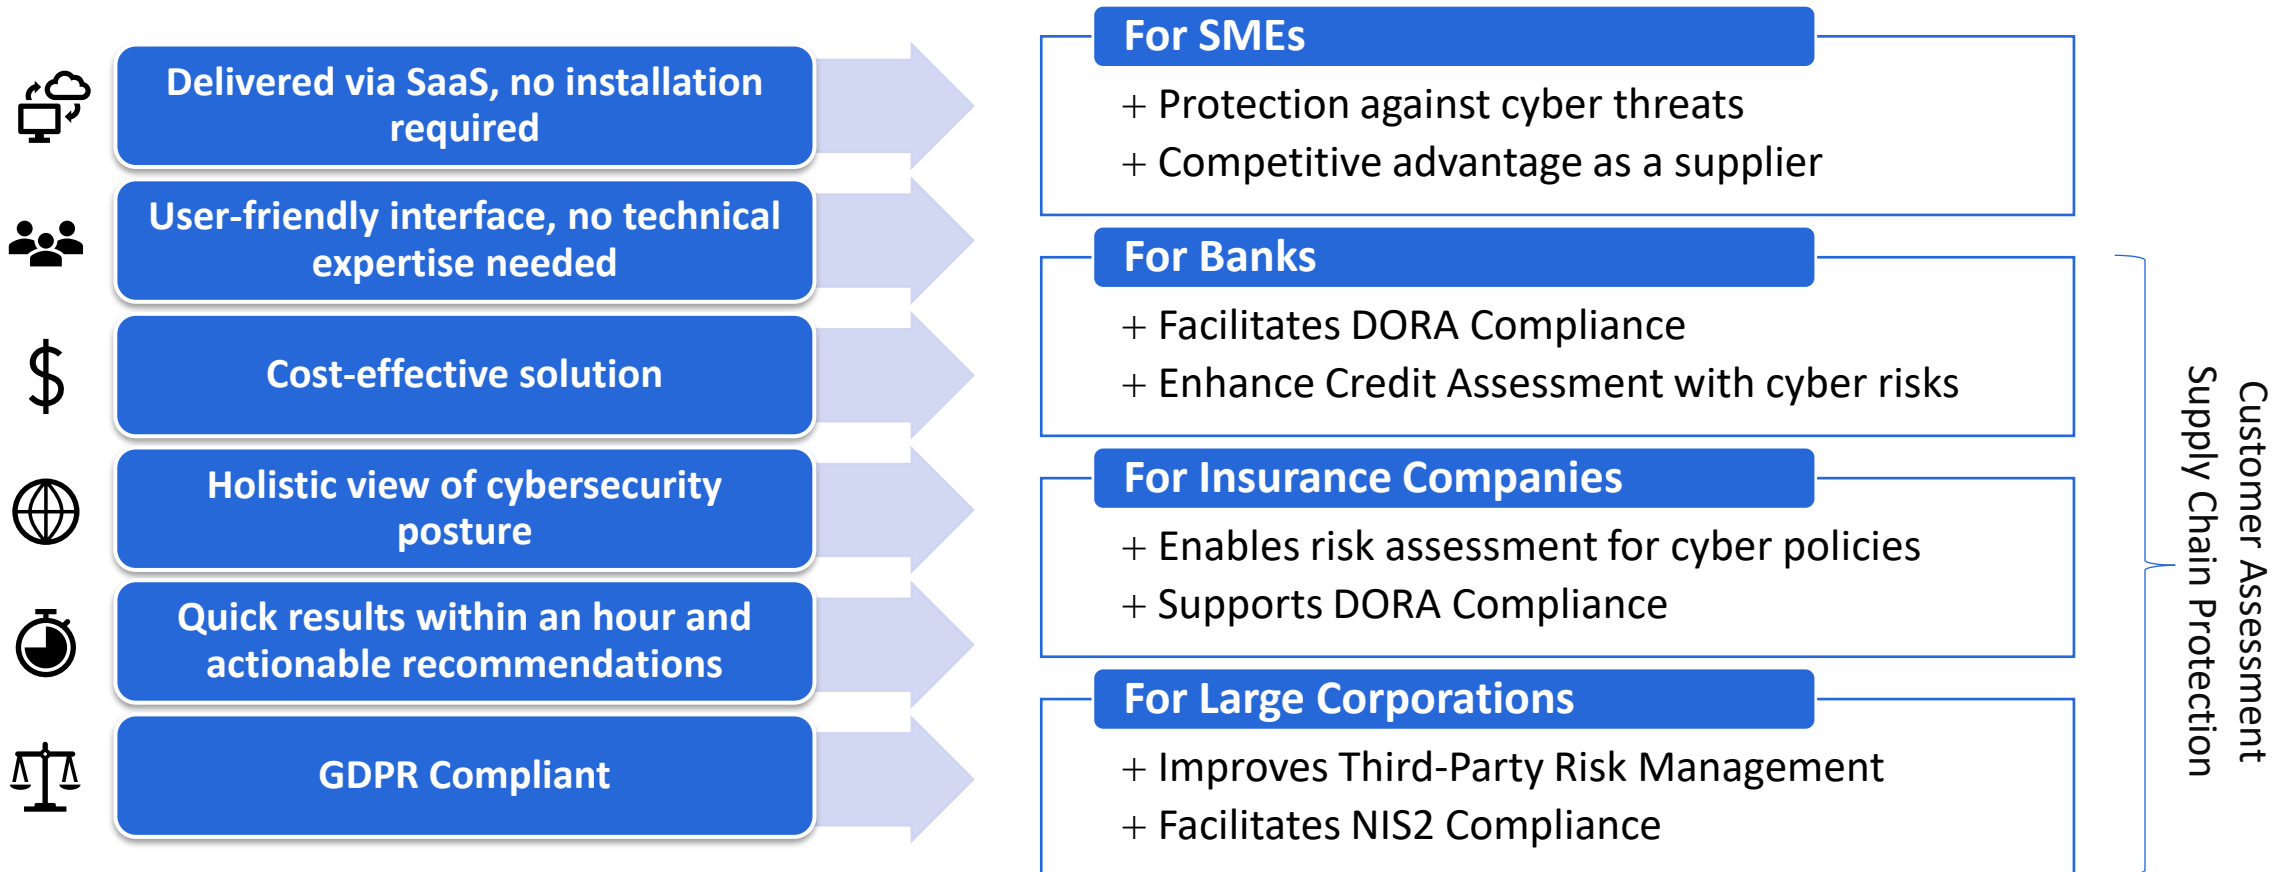

These pillars are individually evaluated and consolidated into a **single overall index**, ensuring a robust and seamless assessment.

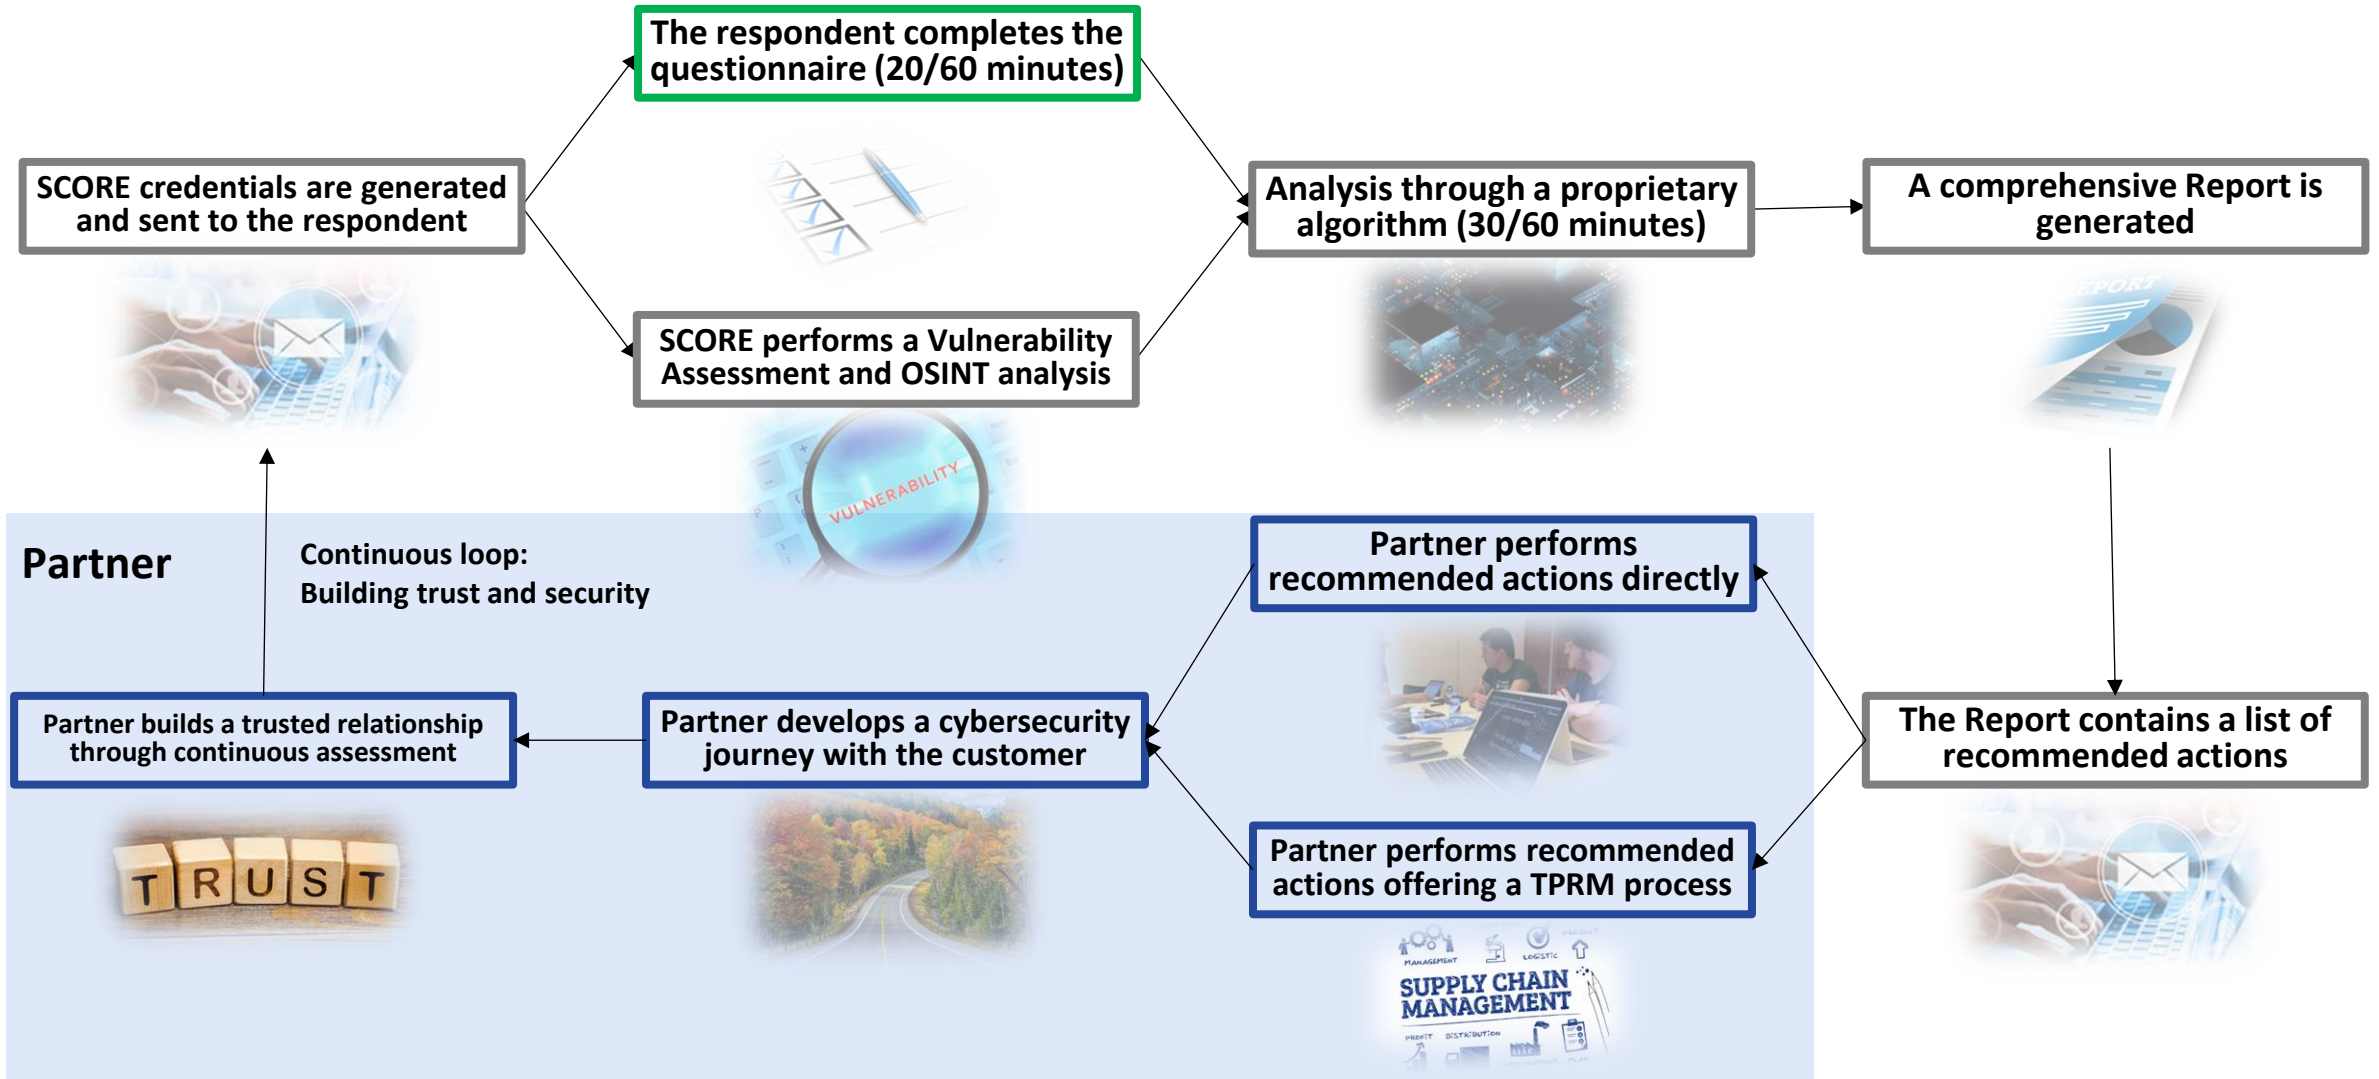

Tailored Cybersecurity Benefits for Different Organizations

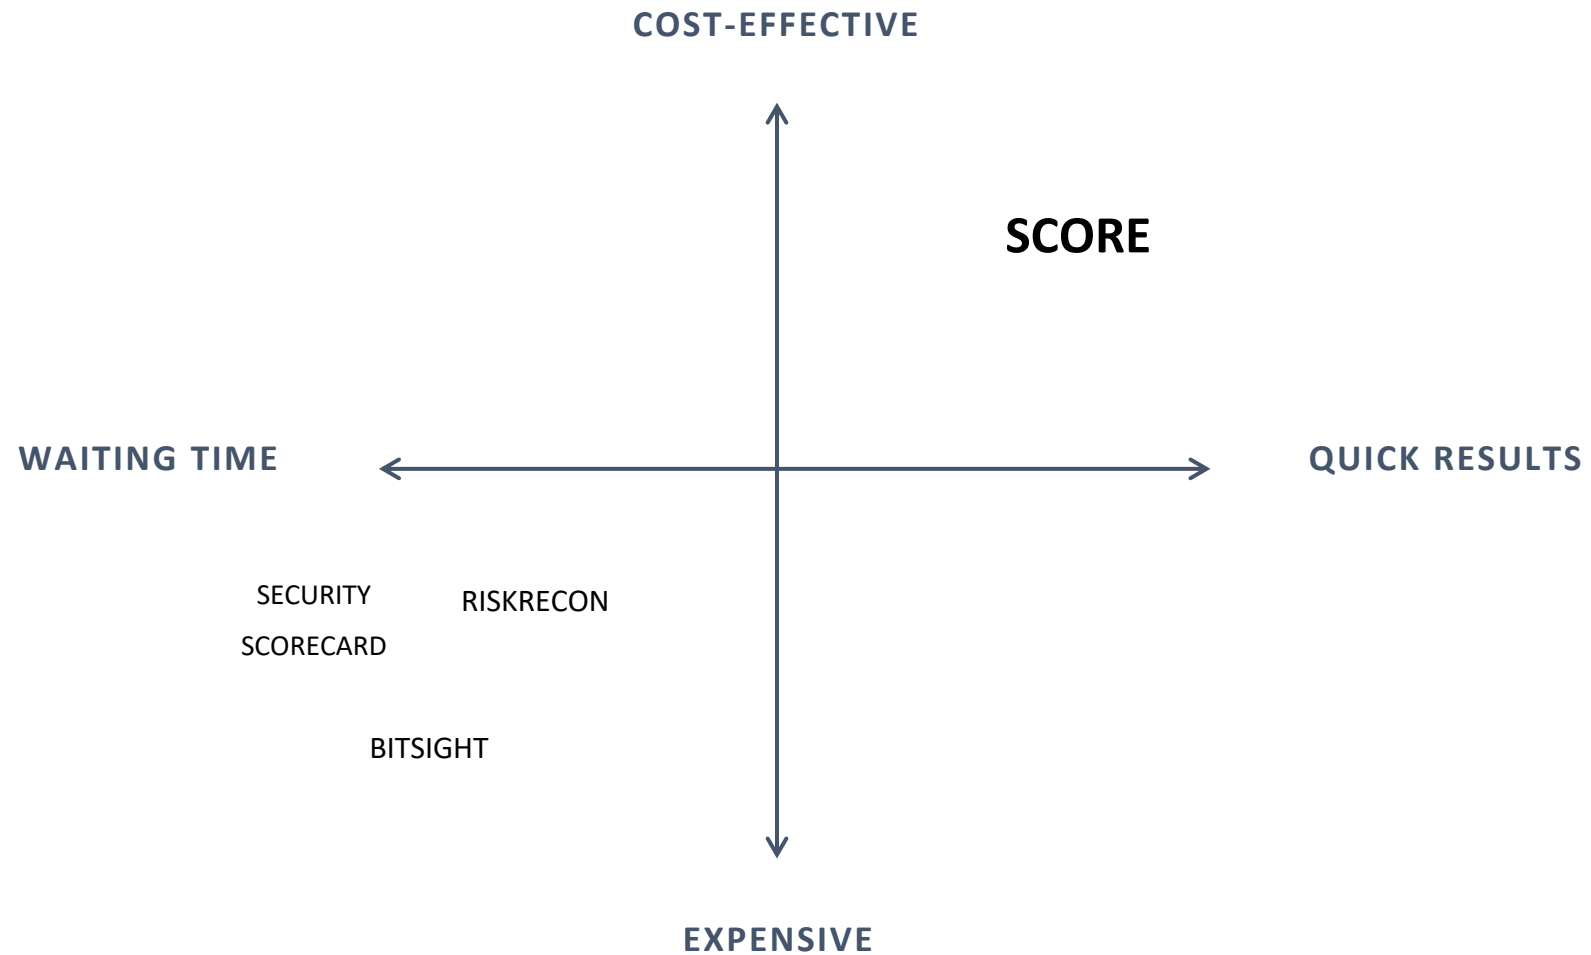

SCORE (Security and Compliance Overall Risk Evaluation) is a user-friendly, cost-effective SaaS solution that delivers comprehensive cybersecurity assessments with actionable insights for various types of organizations

Streamlined Processes and Business Model

SCORE vs. Competitors: Our Unique Advantages

Continuous Evolution of SCORE and its Packages

As cyber threats evolve, our solution continually integrates the latest technology, adding new features to stay ahead of these threats

Standard

- One repeatable run generating a comprehensive report
- Available now

Monitoring

- Standard package plus monthly monitoring of vulnerabilities and OSINT
- Release: January 2025

Tutor

- Monitoring package plus an interactive AI cybersecurity tutor for enhanced protection
- Release: March 2025

Take the Next Step: Secure Your Organization with SCORE Today
